CATALOGUE

OF THE

TRUSTEES, TEACHERS, AND STUDENTS

OF THE

UNION INSTITUTE.

1849.

GREENSBOROUGH.

Printed by Swaim and Sherwood.
1849.

LOCATION.

The Union Institute is in Randolph County, 20 miles N. W. of Ashboro', and 18 S. W. of Greensboro.' Those who come by stage, should stop at Jamestown, from which place to the Institute, private conveyance can at any time be obtained. The *location* is in the hill-country, between the tributaries of Uwharric and Deep rivers; as nearly as any place, exempt from disease, and is in the midst of a moral and intelligent community. All letters to Principal or students, should be directed to Institute, Randolph county, N. C.

PERMANENCY.

This Institution was incorporated in 1841, since which time, it has been in successful operation. It is not entirely dependent upon the number of students, and may be considered as a permanent school. To those who wish to remain several years in a school of its grade, it offers every necessary accommodation.

Total 90.

PREPARATION FOR COLLEGE.

Students are prepared for any College they may prefer, also for whatever class they desire. Young men from this Institution have entered College as far advanced, and have graduated as high as from any preparatory school. Henceforth the Institute will offer *special* advantages to those who desire to prepare for College.

ACADEMIC COURSE OF INSTRUCTION.

Comparatively few persons can obtain a Collegiate education; to the mass, time and funds are wanting; their only resource is the Academic. If possible, every young man should graduate; but if one cannot, a full course at an Academy is evidently preferable to a partial course at College. It is not pretended that our Academic course embraces every thing that a man *ought* to study; but we believe our course is well selected, that it will properly develope and discipline the mind, and that if a young man has time and opportunity for a more extensive course, he should graduate at College. One or all the departments may be pursued, and the time requisite to complete the course will depend on circumstances.

DEPARTMENT OF ENGLISH.

FOURTH CLASS.

Orthography,	} Small works used only at this school.	
Orthoepy,		
Geography.		Mitchell's
English Grammar.		Bullions'
Ancient and Modern History.		

THIRD CLASS.

English Grammar,	Bullions'
Book Keeping.	Preston's
History,	
English Poetry.	Aikin's Collection
Rhetoric.	Blair's

SECOND CLASS.

Logic.	Whately's
Mental Philosophy,	Upham's
Elocution,	Vanderhoff's

FIRST CLASS.

Moral Philosophy,	Wayland's
Political Economy.	"

Reading and Composition attended to through the whole course.
English Dictionary, Worcester's or Webster's.

MATHEMATICAL DEPARTMENT.

FOURTH CLASS.

Arithmetic, Emerson's 2d and 3d parts

THIRD CLASS.

Algebra, Davies'
Geometry, Legendre's
Mensuration.

SECOND CLASS.

Trigonometry, Davies'
Surveying, Gummere's
Mechanics, Olmstead's

FIRST CLASS.

Architecture, Benjamin's
Optics, Olmstead's
Mathematical Astronomy, Gummere's

DEPARTMENT OF NATURAL SCIENCE.

THIRD CLASS.

Natural Philosophy, Comstock's
Chemistry, Draper's
Astronomy, Olmstead's

SECOND CLASS.

Anatomy, Smith's
Botany, Mrs. Lincoln's

FIRST CLASS.

Natural History, Good's
Philosophy, Olmstead's
Geology, Mather's

The experimental sciences are illustrated by a good apparatus.

DEPARTMENT OF LATIN.

FOURTH CLASS.

Grammar, Bullions'
Reader, "
Cæsar, "
Ovid, Brooks'

THIRD CLASS.

Virgil,
Sallust,

SECOND CLASS.

Livy,
Cicero,

FIRST CLASS.

Terence,
Horace,

For reference, Eschenburg's Manual and Anthon's Classical Dictionary.

DEPARTMENT OF GREEK.

THIRD CLASS.

Grammar, }	Bullions'
Reader, }	
Testament,	

SECOND CLASS.

Xenophon's Anabasis,
Herodotus,
Homer.

FIRST CLASS.

Homer,
Demosthenes on the Crown.

Various other authors and subjects are frequently studied under special circumstances.

EXPENSES.

Tuition.

Primary Department,	-	-	\$5 per Session.
English through Rhetoric, also Arithmetic,	6	"	"
Higher Eng. & Mathematics, also Nat. Science	8	"	"
Languages,	-	-	10 " "

Students may enter at any time, and are charged only from the time till the end of the session; but after entering, no deduction is made except for protracted sickness.

Board.

Board and Washing, per month, - \$5.

No extra charge for fuel, furniture, &c., except that the student finds his own candles.

Books.

An assortment of books is constantly kept on hand, and students supplied cheaper, perhaps, than elsewhere.

Payment for Tuition, Board, Books, &c., to be made at the end of the session.

The year is divided into two sessions of 22 weeks each; the summer session closes on the second Thursday in August, and the winter session commences after a vacation of 5 weeks.

The winter session of 1849 will commence on the 1st of October.

The Columbian Society annually selects a speaker, who delivers an address at the close of the summer session. This is a flourishing society, has a small library and is rapidly increasing.

The students regularly attend Sabbath school exercises and Divine worship on the sabbath; their morals are cultivated as well as their minds. At the students' meetings at the Institute within the last two years much has been done for piety and virtue.

ENGLISH—Juniors, 8 ; Freshman, 45 ; Preparatory, 8 ; - - -	61
Total, - - - - -	129

COURSE OF INSTRUCTION.

IN arranging this, much attention has been given to the wants of the Country; for though excellent Colleges are flourishing at no great distance, they by no means supply the literary demand of the day. It is clearly evident, that Institutions organized by the models of a past generation, cannot in all respects be applicable to this, that the progression of mind will require new adaptations in its onward course; and that votaries of ancient forms must either remain behind the tide of time, or meet the advances of intellect by reconstruction. Whilst our course of study is not essentially different from the oldest and best Colleges, it is adapted to the phases of society around us. The usage that would subject all manner of intention and talent to the same routine, and that instead of developing, strives to make all minds alike, has been discarded. Our course of instruction has been formed after mature deliberation; a thorough *understanding* of it, will be rigorously exacted before honors are conferred; mere sojourn for a specified time, will not be sufficient. The course is divided into Classical and English; the former, similar to College courses generally, requires four years; the latter, embracing all that is necessary to make an accomplished English scholar, requires, ordinarily, three years. Students will be placed in that department that may be selected by themselves, their Parents, Guardians, or the Faculty; and will be regularly graduated when their studies are completed. We desire to remove from our countrymen, the delusion which teaches that a finished education is necessary for none but professional men; that the Merchant, the Mechanic, and the Farmer would in no way be benefitted by the treasures of Science. Here is a College established for the *people*, sustained and encouraged by a Board of Trustees who feel the importance of their work, and who are determined that no pains or expense shall be spared to make it equal to any in accommodations and profound scholarship. Though a smaller amount of study is required for admission into this than most of Colleges, our course is not less extensive; by assigning more studies to the advanced classes, we avoid the useless custom of allowing Juniors and Seniors to be comparatively idle, and prevent the common complaint, "that the last year of College life is more show than substance."

CLASSICAL COURSE.

PREPARATORY.

CANDIDATES for admission into the Freshman Class, must stand an approved examination upon Orthoepy, Orthography, Oral and Written Arithmetic, Geography, English and Latin Grammar, Latin Reader and Cæsar. This is a small preparatory, and will be fully required in all cases.

FRESHMAN CLASS.

First Term.—Arithmetic—its general principles and applications; Algebra; English Grammar; Geography; History, United States; Ovid; Greek Grammar and Reader; Mythology and Ancient Geography; Book Keeping.

Second Term.—Algebra; Geometry; English Prosody and Poetry; Historical Geography; Virgil; Anabasis and Testament; Natural Philosophy; History, United States; Chronology.

SOPHIOMORE CLASS.

First Term.—English Literature; Sallust and Cicero; Geometry; Trigonometry, Natural Philosophy; Chemistry; Herodotus; Composition; Ancient History.

Second Term.—Livy; Surveying, Mensuration, and Navigation; Homer; Chemistry; Greek, and Roman Antiquities; Astronomy; Composition, and Elocution.

JUNIOR CLASS.

First Term.—Terrence; Homer; Analytical Geometry; Mechanics; Rhetoric; Horace; Uranography; Modern History.

Second Term.—Cicero De Oratore; Demosthenes; Differential and Integral Calculus; Botany and Natural History; Logic; Agricultural Chemistry.

SENIOR CLASS.

First Term.—Tacitus; Greek Tragedy; Mathematical Astronomy; Mental Philosophy; Geology; Mineralogy; Kames' Elements.

Second Term.—Horace; Architecture and Engineering; Moral Philosophy; Political Economy; Butler's Analogy; Lectures on Natural and Political Law.

ENGLISH COURSE.

PREPARATORY.

Orthoepy; Orthography; Reading; Writing; Primary Geography; Oral and Written Arithmetic.

FRESHMAN CLASS.

First Term.—Arithmetic; English Grammar; Geography; Reading and Writing Exercises; Outlines of Natural Philosophy and Physiology.

Second Term.—Arithmetic; English Grammar; Geography; Composition; Book Keeping; Natural Philosophy; History, United States.

JUNIOR CLASS.

First Term.—Punctuation, Prosody, and Poetry; Arithmetic in its applications; Natural Philosophy, general principles and applications; Geography, with Globes and Drawing; Astronomy, Composition, Algebra.

Second Term.—English Literature; Algebra; Chemistry; Geometry; Botany; Ancient History; Logic; Analytical Geometry; Elocution.

SENIOR CLASS.

First Term.—Geometry; Mental Philosophy; Trigonometry, Mensuration, Surveying and Navigation; Kames' Elements; Uranography; Hart's Constitution; Rhetoric; Integral and Differential Calculus.

Second Term.—Political Economy; Agricultural Chemistry; Moral Science; Mechanics and Mathematics; Astronomy; Butler's Analogy; Geology.

TEXT BOOKS AND STUDIES.

In addition to the regular course, instruction is given in the Modern Languages if desired, without extra charge. A supply of Books is kept at College for the accommodation of students; but, in order that persons wishing to supply themselves elsewhere, may know what books to select, the following partial list is subjoined:

Bullion's English, Latin, and Greek Grammars; also, his Latin, and Greek Readers, and Cæsar; Emerson's series of Arithmetic; Mitchell's Geography; Frost's United States History; Peirce's entire course of Mathematics; Comstock's Philosophy; Draper's Chemistry; Mattison's Astronomy; Olmstead's Mechanics; Blair's Rhetoric; Kendall's Uranography; Mrs. Lincoln Phelps's Botany; Whately's Logic; Upham's Mental Philosophy; Mather's Geology; Wayland's Political Economy,

and Moral Science. Books of reference: Lampriere's, and Smith's Classical Dictionaries; Eschenburg's Manual; Baldwin's Gazetteer; Webster's or Worcester's English Dictionary.

LANGUAGES.—LATIN.

The first term of the FRESHMAN CLASS, is employed upon four books of Brooks' Ovid, during which time, the class is expected to acquire a knowledge of Mythology and Prosody, and to thoroughly master the laws of Latin Construction.

The second term is devoted to the Bucolico and Æneid of Virgil; with exercises in Classical Chronology; literal and elegant translations, and Poetic diction.

SOPHOMORE CLASS.—In the first term, Sallust and four Orations of Cicero.

Second term, six books of Livy, Roman Antiquities, construction and composition.

JUNIOR CLASS.—First term; one Play in Terrence, and the Odes, Satires and Epistles of Horace, with daily exercises in Latin Versification.

The second term is devoted to Cicero De Oratore.

SENIOR CLASS.—The first term is devoted to the Germania of Tacitus, and the second to Horace's Art of Poetry, with such exercises as tend to cultivate taste and mature scholarship.

GREEK.

THE FRESHMAN CLASS, in the first term, study the Grammar, and complete the Reader; the second is devoted to Xenophon's Anabasis, with a critical study of the Grammar.

During the first term, the SOPHOMORE CLASS read Herodotus, in connexion with the study of Idioms, and Dialects; the second is devoted to Homer.

THE JUNIOR CLASS, during the first term, is employed upon a review of Homer, Select Pieces, and Composition; the Orations of Demosthenes, occupy the second.

THE SENIOR CLASS, in the first term, read a Tragedy of Sophocles or Euripides; the second is employed upon selections from Plato, if the Professor and Class think proper.

Weekly recitations are required from the Freshman and Sophomore Classes on the Testament.

MATHEMATICS.

FRESHMAN CLASS.—During the first term, Arithmetic is thoroughly

reviewed in connexion with its practical applications. The greatest possible attention is paid to this branch of Mathematics. The Class also complete Peirce's Algebra to equations of the second degree.

In the second term, Algebra is completed with eleven chapters of Geometry.

SOPHOMORE CLASS.—The Class in the first term, complete Geometry, and Plane and Spherical Trigonometry; in the second, Surveying, Mensuration and Navigation.

JUNIOR CLASS.—The first term is devoted to Analytical Geometry. The first eight chapters of Olmstead's Philosophy, and the Article on Magnetism.

Second term; Integral and Differential Calculus.

SENIOR CLASS.—During the first term, the class study Peirce's or Gumre's Astronomy; and during the second, they exercise twice per week upon the Orders and Laws of Architecture, and the principles of Civil Engineering.

ENGLISH.

THE large space allotted to studies of this description in the course, is proof of the estimation in which they are held, and of the attention devoted to them. Orthography, Definition, Reading, Writing, and Composition, are attended to with great care; also, an intimate acquaintance with English Grammar, Punctuation, Prosody, and the general character of English Literature, is absolutely demanded. Due stress is laid upon the use, as well as the theory of Rhetoric, Logic, Mental Philosophy, Political Economy, Criticism, &c. Mere knowledge of text books is not sufficient, the student must understand the subjects, and be able to use them in the pursuits of life.

NATURAL SCIENCE.

NATURAL Philosophy and Chemistry are illustrated and explained by regular lectures with a splendid Apparatus; the student is not only made to understand these beautiful and useful sciences, but has them so impressed upon his mind, that he cannot easily forget them. Astronomy is illustrated by suitable instruments, and Geology, by an ample collection of specimens. A museum is in progress of formation that will be sufficient for the general purposes of Geology, Natural History, Botany, Anatomy, Physiology, &c.

BIBLE STUDIES.

WHILE sectarianism is rigorously excluded, the Bible is a constant

text book ; portions are read and explained to the students daily, and all the duties of man constantly urged. For unless high, noble and good character be formed, learning is vain ; neither Home nor State is profited by cultivated minds with bad hearts ; humanity needs no such aid.

THE ENGLISH COURSE.

TO ACCOMMODATE a large number of our countrymen, this course has been adopted. Many young men of noble minds, but lacking time and funds, despair of finishing a course, or of reaching collegiate honors, and, therefore, make no effort. Since such can scarcely hope to be complete in every thing, we give them the opportunity of the highest honors in a few. *Such men are greatly needed.* The country wants men thoroughly versed in Mathematics, in the Natural Sciences, and in English Literature ; to encourage such, we offer them the due reward of talent, energy and enterprise.

THE NORMAL DEPARTMENT.

THIS Institution is styled "Normal College," because it has a special organization for the instruction of Teachers ; and is endowed with the the privilege by the Legislature, of giving certificates that are valid in any part of North Carolina. The fifth section of the Act of Incorporation reads as follows :

V. *Be it further enacted,* That when any pupil shall have sustained a satisfactory examination on the studies, or course of studies prescribed by the Faculty and Trustees of said College, such persons shall be deemed qualified to teach common schools and may receive a certificate signed by the President and at least seven Trustees, which certificate shall be sufficient evidence of ability to teach in any of the common schools in this State, without any re-examination of the County Committees, and where county certificates are now required before paying out the public funds, the certificate of the Normal College shall answer in lieu thereof.

Those who enter this department, may belong to either the Classical or English Course ; such as have completed the studies of the Freshman Class in either course, and are deemed suitable for Teachers, may receive a certificate to last one year ; completing the studies of the next class will entitle them to a certificate to last two years ; and an English Senior or a Classical Junior, will receive a certificate without limitation. The members of this Class are not only taught *what*, but *how* to teach ; they are instructed in the proper method of teaching the different branches, the manner of conducting a school, the proper principles of school government, and every thing that tends to make them efficient and useful

teachers. Attached to the College, is a Model School of small children ; in this school, the Normal candidates practice ; here, under the inspection of the President, they are drilled in all the minutæ of governing and teaching : here, also, talent for teaching is exemplified, and those who are found unsuitable for that profession, are not passed, and are persuaded to engage in some other pursuit. To young men who wish to prepare for the honorable and useful profession of teaching, this department offers every possible advantage ; and it is hoped, that all who have the general cause of education at heart, will exert their influence to induce young men to enter, and prepare themselves for teaching our Common Schools.

The great mass of the people must depend upon Common schools for their education ; if these schools be taught by well informed and skillful instructors, the people will be profited ; otherwise, they must certainly be injured. Normal College is the teacher's home, the place at which all his wants can be satisfied, and the Institution that will give him honors in proportion to his talent and industry. We have long been importing teachers from Northern schools ; that practice ought to cease : we have talent and ambition, and now we have a school superior in its organization to those, that have so long supplied the South with every grade of instructors. If the young men will enter our halls, we will make them equal to the teachers of any age or nation ; they shall be an honor to the cause of education, and the pride of Carolina. This is the first Institution of the kind, ever established in the South ; its brilliant career thus far, shows the favor in which it is held by the people, and when the young men we are now preparing, shall have gone forth and tested our principles by practical application, we ask no other eulogium.

CLASSING.

ALL who enter this Institution are not preparing to be teachers ; it is entirely optionary with the student and his friends, what course is selected. Without paying any attention to the Normal instruction, one may enter as any Irregular ; in the Preparatory, or if prepared, in one of the Classes in either course, and graduate in the same manner and with the same honors, as at the oldest Colleges. We should be glad, however, that a larger number would enter the Normal Department.

PREPARATORY AND IRREGULAR DEPARTMENT.

THIS department possesses superior advantages for those preparing for this or any other College. Such as desire a partial course, will enjoy all

the privileges of Apparatus, Museum, Lectures and College associations, that any Institution can afford, without being confined to a course of instruction opposed to their purposes or opportunities. Those preparing for this Institution, will find this as cheap, as perhaps any school where appropriate instruction can be obtained ; and therefore, it will be advantageous for them to prepare here. Such as design entering the University or any other distant College, can prepare here as cheap, and certainly with more advantages, than at a common school ; we, therefore, invite all who are preparing for College, to enter this Institution ; assuring them that our advantages are not surpassed by any school. Young men from our preparatory, have entered the Junior Class at the best Colleges in the South, and over competitors well trained and talented, have been victorious. We mention these things because we know our Preparatory is of a superior character.

THE PRESIDENT.

THE whole College in all its divisions, is directly under his supervision ; whilst the different departments of instruction are committed to appropriate Professors, the students are amenable to the President for their progress, and are subjected to weekly examinations before him and the rest of the Faculty. As occasion may require, competent Tutors are employed to assist the Professors. Quarterly reports of scholarship and deportment, are sent to parents, guardians, &c.

TERMS AND VACATIONS.

THE year is divided into two terms ; the first commencing on Wednesday, six weeks after the last Thursday in July, and continuing twenty-two weeks ; the second commences after a vacation of two weeks and continues till the last Thursday in July, which is the annual COMMENCEMENT.

EXPENSES.

Students pursuing the classical collegiate course, are charged \$15 per session for Tuition ; those in the English course, pay \$12.

Tuition, for Geography, English Grammar, and Primary Arithmetic, is \$8 per session ; for the same more advanced, in connexion with Philosophy, Compositions, &c., \$10 per session. No extra charges of any description ; though at similar institutions, these form a considerable item of expense.

Board, washing, rooms, fuel, &c., from \$5 to \$6 per month. No extras of any kind, except that the students find their own candles.

BOARDING.

THE non-resident system has been adopted ; the students board at a

large Hotel, subject to College regulations ; or, at private boarding houses in the immediate vicinity of the Institution. Ample accommodations are provided for any number likely to attend.

GENERAL INFORMATION.

STUDENTS may enter at any time, and pay from the time of entering to the end of the term. No deduction is made for those who stay away a week or two after the term commences, and then join the regular classes ; nor is allowance made in any case after entering, except for protracted sickness.

Students are not permitted to remain here unless they pursue a reasonable number of studies, and attend promptly to the ordinary College regulations ; nor are they permitted to indulge in habits, contrary to morality, good order and genteel deportment. The Faculty are determined, that the College shall not be corrupted by idle or vicious members. Parents are invited to visit their sons at their rooms, recitations and studies, and inspect their progress, manners and accommodations. The friends of students are earnestly advised, that much pocket money is unnecessary, and that extravagance in this respect, is injurious to all parties.

SOCIETIES, LIBRARIES, &c.

THE Literary Societies are in a flourishing condition, and afford every means for this species of improvement. Their Libraries are increasing rapidly, and will soon contain a complete variety of works on Biography, History, Philosophy, Poetry, Ancient and Modern Literature in general.

LOCATION, BUILDINGS, &c.

NORMAL COLLEGE is located in the Northwest corner of Randolph county, eighteen miles Southwest of Greensborough, twenty Northwest of Asheborough, and sixteen nearly East of Lexington. It is three-fourths of a mile from the Fayetteville and Western Plank Road, and three miles from the Central Rail Road ; when these works are completed, it will have every facility of access. The nearest point of public conveyance at present, is Jamestown, seven miles North, from which place to the College, private conveyance can at any time be obtained by applying to Dr. Coffin. The location is in the country, on the highlands between the tributaries of Uwharrie and Deep rivers ; as nearly as any place exempt from disease and facilities for dissipation, and in the midst of a refined and moral community. Large and commodious buildings will be completed in a very short time.

COURSE OF STUDY.

THE course of instruction is, in some respects, different from that generally adopted in Colleges; not less, however, in extent, nor requiring less time and ability for its completion. It is clearly evident, that Institutions organized by the models of a past generation, cannot in all respects be applicable to this; that the progression of mind will require new adaptations in its onward course; and that an age enriched by invention and change in every other department of human enterprise, will surely admit of sound improvement in the organization and management of Colléges. We demand, comparatively, a small amount of study for admission into College; in this determination we have been influenced by the well known fact, that by the time young men, hitherto, have been prepared to enter College, their modes of thought, mental habits and taste, have been so unalterably fixed, that College influences to a large extent, have been unavailing. We have attempted to avoid this evil, by subjecting our preparatory students to College regulations, and bringing them into the regular classes at an earlier day. Every scholar knows, that it requires but very moderate application to complete the ordinary course in four years, and that necessity for more vigorous industry would be a great pre-

ventive to dissipation. Our course, as it is as extensive as others, will require close attention, will suit the spirit of the laborious and energetic, and will do something towards the formation of those industrious habits, that are so important in the pursuits of life.

The day has arrived when "graduation for the name" has lost its charm; empty titles will no longer bear a man on to fortune and fame. Colleges should not only thoroughly instruct, but form good habits, arouse to noble exertions and enlarged views, inspire a high order of intellectual and moral excellence, and develope all powers in due proportion. Education has seldom been effective except where it was very common, or very rare; when rare, it is an engine of tyranny, when common, the palladium of liberty. No State needs it more, or has been benefitted less in the mass of her citizens by Collegiate education, than North Carolina. The noble and cultivated talent, that has come forth from the University, has to a large extent either pined and died through want of appreciation, or has gone to bless and adorn other States. — This country affords no asylum for a learned aristocracy, and the people know far too little of profound learning, either to enjoy its advantages or reward its services. Utilitarians, falsely so called, united with short sighted avarice, have cursed the land by calling money, FORTUNE, and the "Single Rule of Three," EDUCATION. Every American is a nobleman by birth, and may be a statesman by effort; and he needs the ennobling, inspiring influence of a genuine, public Institution to develope his powers and form his taste. Our Colleges, almost exact copies of Institutions suited to the spirit of a different government, have perhaps exerted rather an unpropitious influence upon the *general* spread of *thorough* education; for the College that profound-

ly educates a man, but sends him forth with manners, habits and sentiments unsuited to the civil and social requisitions of his Country, does both the man and the State great harm rather than good. The organization of Normal College is an attempt to unite necessity for exertion with profound study; to correctly develope, chasten and adorn republican intellect by a thorough course of study, vigorously applied. In Europe none but the nobles, and professional men, need a finished education, because the remainder is not blessed with either freedom of thought or action; but in this Union, where every man thinks for himself and is the architect of his own fortune, a complete classical education is absolutely essential.

The sentiment generally prevails, that the sons of our most distinguished citizens, are destined to be insignificant, and almost every family affords some evidence of its truth; but if such a deplorable necessity is in existence, it is undoubtedly of man's own making, and might be remedied. The sons of wealth, power and fame, are educated in our most approved Institutions, and, since such persons must by nature be equal, if not superior to all others, if, as a general rule, they fail to be honorable and useful, there must be a radical fault in their education. If it be said, that "circumstances thwart the educational influences thrown around them," it must be answered, that "education forms the man;" and if the organizations now in use fail to prevent the degradation of so large and valuable a portion of humanity, such organizations are either impotent, or want adaptation. Perhaps, they form habits, principles and associations inconsistent with the requisitions, pursuits and pleasures of a government, such as ours; or whilst ease, luxury and desire of gain, are sapping the foundation of personal worth, our educational systems may be using none, or the wrong

corrective influences. The subject is worthy of close thought and honest investigation. We have seen and felt that the evils and circumstances of the day, are playing havoc with our most important interests, and if a preventive be not found in religious education, we know not where to look. The Legislature having given us a charter, we have with much solicitude, organized Normal College *as it is*; so far it has fully met public expectation; we invite the learned, the experienced, the man of the world and the christian, all to examine it minutely. The Statesman cannot be indifferent, for it is shaping the destiny of many citizens; the Minister is interested, for it is doing much either for, or against the interest of his Master's vineyard; and the father has some concern, since Normal College *might* be an agency in bringing peace and happiness upon his declining years.

CLASSICAL COURSE.

PREPARATORY.

CANDIDATES for Admission into the Freshman Class, must stand an approved examination upon Orthoepey, Orthography, Oral and Written Arithmetic, Geography, English and Latin Grammar, Latin Reader and Cæsar. This is a small preparatory, and will be fully required in all cases.

FRESHMAN CLASS.

First Term.—Arithmetic—its general principles and applications; Algebra; English Grammar; Geography; History, United States; Ovid; Greek Grammar and Reader; Mythology and Ancient Geography; Book Keeping.

Second Term.—Algebra; Geometry; English Prosody and Poetry; Historical Geography; Virgil; Anabasis and Testament; Natural Philosophy; History, United States; Chronology.

SOPHOMORE CLASS.

First Term.—English Literature; Sallust and Cicero; Geometry; Trigonometry; Natural Philosophy; Chemistry; Herodotus; Composition; Ancient History.

Second Term.—Livy; Surveying, Mensuration, and Navigation; Homer; Chemistry; Greek, and Roman Antiquities; Astronomy; Composition, and Elocution.

JUNIOR CLASS.

First Term.—Terrence; Homer; Analytical Geometry; Mechanics; Rhetoric; Horace; Uranography; Modern History.

Second Term.—Cicero De Oratore; Demosthenes; Differential and Integral Calculus; Botany and Natural History; Logic; Agricultural Chemistry.

SENIOR CLASS.

First Term.—Tacitus; Greek Tragedy; Mathematical Astronomy; Mental Philosophy; Geology; Mineralogy; Kames' Elements.

Second Term.—Horace; Architecture and Engineering; Moral Philosophy; Political Economy; Butler's Analogy; Lectures on Natural and Political Law.

ENGLISH COURSE.

PREPARATORY.

Orthoepy; Orthography; Reading; Writing; Primary Geography; Oral and Written Arithmetic.

FRESHMAN CLASS.

First Term.—Arithmetic; English Grammar; Geography; Reading and Writing Exercises; Outlines of Natural Philosophy and Physiology.

Second Term.—Arithmetic; English Grammar; Geography; Composition; Book Keeping; Natural Philosophy; History, United States.

JUNIOR CLASS.

First Term.—Punctuation, Prosody, and Poetry; Arithmetic in its applications; Natural Philosophy, general principles and applications; Geography, with Globes and Drawing; Astronomy; Composition; Algebra.

Second Term.—English Literature; Algebra; Chemistry; Geometry; Botany; Ancient History; Logic; Analytical Geometry; Elocution.

SENIOR CLASS.

First Term.—Geometry; Mental Philosophy; Trigonometry, Mensuration, Surveying and Navigation; Kames' Elements; Uranography; Hart's Constitution; Rhetoric; Integral and Differential Calculus.

Second Term.—Political Economy; Agricultural Chemistry; Moral Science; Mechanics and Mathematics; Astronomy; Butler's Analogy; Geology.

—o—

TEXT BOOKS AND STUDIES.

In addition to the regular course, instruction is given in the Modern Languages, and Hebrew if desired, without extra charge. A supply of Books is kept at College for the accommodation of students; but, in order that persons wishing to supply themselves elsewhere, may know what books to select, the following partial list is subjoined:

Bullion's English, Latin, and Greek Grammars; also, his Latin, and Greek Readers, and Caesar; Emerson's series of Arithmetic; Mitchell's Geography; Frost's United States History; Loomis' entire course of Mathematics; Comstock's Philosophy; Draper's Chemistry; Mattison's Astronomy; Olmstead's Mechanics; Blair's Rhetoric; Kendall's Uranography; Mrs. Lincoln Phelps's Botany; Whately's Logic; Upham's Mental Philosophy; Mather's Geology; Wayland's Political Economy, &c.

ENGLISH.

THE large space allotted to studies of this description in the course, is proof of the estimation in which they are held, and of the attention bestowed upon them. We hold it as a fixed principle, that a thorough knowledge of our own language, is an indispensable basis of genuine education, and that without English proficiency, Classical attainments are of but little value. Orthography, Definition, Reading and Writing are made special exercises in all the Classes; while analysis of the best English authors, and Composition, are daily duties of every student. History and Historical Geography, are taught systematically; Rhetoric and Logic are studied theoretically and then applied in the analysis of every species of literary composition; Mental and Moral Philosophy are completed by biographical and historical illustrations; and Political Economy is studied with constant reference to Duties, Treaties of Commerce, Corporations, Patents, &c. Natural Philosophy is studied with constant reference to Machinery and the Mechanic Arts, and Chemistry, illustrated by the necessary experiments, will be completed by an Agricultural application with analysis of soils, manures, grain, &c. Young gentlemen who wish to pursue a partial course, or to pay special attention to some particular subject, will here find every facility afforded, and will at the same time have the advantage of College discipline and association.

NATURAL SCIENCE.

NATURAL Philosophy and Chemistry are illustrated and explained by regular lectures with a splendid Apparatus; the student is not only made to understand these beautiful and useful sciences, but has them so impressed upon his

mind, that he cannot easily forget them. Astronomy is illustrated by suitable instruments, and Geology, by an ample collection of specimens. A museum is in progress of formation that will be sufficient for the general purposes of Geology, Natural History, Botany, Anatomy, Physiology, &c.

BIBLE STUDIES.

WHILE sectarianism is rigorously excluded, the Bible is a constant text book; portions are read and explained to the students daily, and all the duties of man constantly urged. For unless high, noble and good character are formed, learning is vain; neither Home nor State is profited by cultivated minds with bad hearts; humanity needs no such aid.

Normal College, as the name indicates, is an Institution in which men are educated to be useful. If the "learned man that imparts no instruction to others, is the worst miser," such character should be avoided in the formation. Those who graduate for the name, and expect to live without personal effort, will not find this Institution agreeable to their wishes, and are advised not to enter; but those who wish to become men of power, and afterwards to apply their gifts and acquirements for the advancement of their own fortunes and the happiness of others, will here find an Institution suited to his desires. This College has a special organization for the instruction of Teachers; and is endowed with the privilege by the Legislature, of giving certificates that are valid in any part of North Carolina. The fifth section of the Act of Incorporation reads as follows:

V. *Be it further enacted*, That when any pupil shall have sustained a satisfactory examination on the studies, or course of studies prescribed by the Faculty and Trustees of said College, such persons shall be deemed qualified to teach common schools and may receive a certificate signed by the President and at least seven Trustees, which

certificate shall be sufficient evidence of ability to teach in any of the common schools in this State, without any re-examination of the County Committees, and where County certificates are now required before paying out the public funds, the certificate of the Normal College shall answer in lieu thereof.

It has been reported, that all who enter this College, are to be school teachers, and take a pledge to that effect; *the report is wholly untrue*. It is entirely optionary with every student whether he receives Normal Instruction or not, and any one, regular or irregular, may attend the Normal Lectures if he wishes so to do. No one will receive a Normal Certificate, or Diploma, who has not been regularly trained in our course of lectures, or by some other means learned the Theory and Art of teaching, and all who are prepared and wish it, will receive certificates for one or two years, or be graduated according to their advancement.

The Normal Department.

—o—

THE Normal department is needed more than any other; every County in this State needs from forty to one hundred teachers, and upon an average *four thousand* teachers are employed every year. These teachers are doing more for the weal or woe of North Carolina than any other class of men. Is one half of them sufficiently educated? No. If they have knowledge enough, do they know how to teach? Are Law, Medicine, and Divinity, more easily learned than the proper manner of instructing and training the immortal mind? Does even a *finished* education make men safe Lawyers, Physicians, &c., without anything further? Are years of experience, profound learning, full courses of lectures and the accumulated wisdom of ages, necessary in administering medicine to the body? and shall the immortal part be given up to unlearned and unskilful instruction? *Teaching is a great profession*, it is now a profitable business; a splendid theatre of usefulness is open, and good actors are in great demand.

The members of the Normal Class are not only taught

what, but *how* to teach; they are instructed in the proper method of teaching the different branches, the manner of conducting a school, the proper principles of school government, and every thing that tends to make them efficient and useful teachers. Attached to the College, is a Model School of small children; in this school, the Normal candidates practice; here, under the inspection of the President, they are drilled in all the minutiae of governing and teaching: here, also, talent for teaching is exemplified, and those who are found unsuitable for that profession, are not passed, and are persuaded to engage in some other pursuit. To young men who wish to prepare for the honorable and useful profession of teaching, this department offers every possible advantage; and it is hoped, that all who have the general cause or education at heart, will exert their influence to induce young men to enter, and prepare themselves for teaching our Common Schools.

The great mass of the people must depend upon Common Schools for their education; if these schools be taught by well informed and skilful instructors, the people will be profitted; otherwise, they must certainly be injured. Normal College is the teacher's home, the place at which all his wants can be satisfied, and the Institution that will give him honors in proportion to his talent and industry. We have long been importing teachers from Northern schools; that practice ought to cease: we have talent and ambition, and now we have a school superior in its organization to those, that have so long supplied the South with every grade of instructors. This is the first Institution of the kind, ever established in the South; its brilliant career thus far, shows the favor in which it is held by the people, and when the young men we are now preparing, shall have gone forth and

tested our principles by practical application, we ask no other eulogium.

HONORS.

Certificates for one and two years are given to those who have reached a certain grade; those who have completed the Normal course, are graduated as Teachers, and those who complete the regular course receive the same distinctions as at other Colleges. By reference to the Students, it will be perceived that our regular classes are quite full for a young Institution.

Preparatory and Irregular Department.

THIS department possesses superior advantages for those preparing for this or any other College. Such as desire a partial course, will enjoy all the privileges of Apparatus, Museum, Lectures and College associations, that any Institution can afford, without being confined to a course of instruction opposed to their purposes or opportunities. Those preparing for this Institution, will find this as cheap, as perhaps any school where appropriate instruction can be obtained; and therefore, it will be advantageous for them to prepare here. Such as design entering the University or any other distant College, can prepare here as cheap, and certainly with more advantages, than at a common school; we, therefore, invite all who are preparing for College, to enter this Institution; assuring them that our advantages are not surpassed by any school.

THE PRESIDENT.

THE whole College in all its divisions, is directly under his supervision; whilst the different departments of instruction are committed to appropriate Professors, the students are amenable to the President for their progress, and are

subjected to weekly examinations before him and the rest of the Faculty. As occasion may require, competent Tutors are employed to assist the Professors. Quarterly reports of scholarship and deportment, are sent to parents, guardians, &c.

TERMS AND VACATIONS.

THE year is divided into two terms ; the first commencing on Wednesday, six weeks after the last Thursday in July, and continuing twenty-two weeks ; the second commences after a vacation of two weeks and continues till the last Thursday in July which is the annual COMMENCEMENT.

EXPENSES.

STUDENTS pursuing the classical collegiate course, are charged \$15 per session for Tuition ; those in the English course, pay \$12.

Tuition, for Geography, English Grammar, and Primary Arithmetic, is \$8 per session ; for the same more advanced, in connexion with Philosophy, Compositions, &c., \$10 per session. No extra charges of any description ; though at similar institutions, these form a considerable item of expense.

Board, washing, rooms, fuel, &c., from \$5 to \$6 per month. No extras of any kind, except that the students find their own candles.

BOARDING.

THE non-resident system has been adopted; the students board at large Hotels, subject to College regulations; or, at private boarding houses in the immediate vicinity of the Institution. Ample accommodations are provided for any number likely to attend.

GENERAL INFORMATION.

STUDENTS may enter at any time, and pay from the time of entering to the end of the term. No deduction is made for those who stay away a week or two after the term commences, and then join the regular classes; nor is allowance made in any case after entering, except for protracted sickness.

Students are not permitted to remain here unless they pursue a reasonable number of studies, and attend promptly to the ordinary College regulations; nor are they permitted to indulge in habits, contrary to morality, good order and genteel deportment. The Faculty are determined, that the College shall not be corrupted by idle or vicious members. Parents are invited to visit their sons at their rooms, recitations and studies, and inspect their progress, manners and accommodations. The friends of the students are earnestly advised, that much pocket money is unnecessary, and that extravagance in this respect, is injurious to all parties.

SOCIETIES, LIBRARIES, &c.

THE Literary Societies are in a flourishing condition, and afford every means for this species of improvement. Their Libraries are increasing rapidly, and will soon contain a complete variety of works on Biography, History. Philosophy, Poetry, Ancient and Modern Literature in general.

LOCATION, BUILDINGS, &c.

NORMAL COLLEGE is located in the Northwest corner of Randolph county, eighteen miles Southwest of Greensborough, twenty Northwest of Ashborough, and sixteen nearly East of Lexington. It is three-fourths of a mile from the Fayettevill and Western Plank Road, and three miles from the Central Rail Road; when these works are completed, it will have every facility of access. The nearest point of public conveyance at present, is Jamestown, seven miles North, from which place to the College, private conveyance can at any time be obtained by applying to Dr. Coffin. The location is in the country, on the highlands between the tributaries of Uwharrie and Deep rivers; as nearly as any place exempt from disease and facilities for dissipation, and in the midst of a refined and moral community.

NOTE.—Those marked * are deficient in one or more studies; † in the English Course; ‡ superior to the class in one or more studies.

System of Studies

PREPARATORY TO ADMISSION INTO NORMAL COLLEGE.

APPLICANTS for admission into the Freshman Class, are required to stand an approved examination upon Oral and Written Arithmetic, the Grammars of the English, Latin Greek Languages; Latin Reader, Cæsar, Greek Fables, and Geography.

This is a small requisition, and yet it is rarely accomplished efficiently at the Preparatory Schools in the country. Many, who apply for admission, are very defective in Orthœpy, Orthography and English Grammar. Early faults and omissions in these studies are difficult to remedy, and often exert a lasting and pernicious influence. Parents who design giving their sons a liberal education, should be quite as careful in selecting their primary teachers, as in determining the College at which they shall finish their studies. No College can perform its own duties, and at the same time, supply the deficiencies, and eradicate the errors of incompetent or careless preparatory teachers. Right teaching does not simply mean correct answers; it implies reasoning, modes of thought, adaptation, developement and habit; and many are further from thorough scholarship when they suppose themselves ready to enter College, than when they commenced the preparation.

In the Languages, we find great deficiency in *construction*; and, in the Arithmetic, a general reliance upon *Keys*. Such instruction is of no value in itself, and is infinitely worse than no basis for further acquisitions. From some sections our students come well prepared. To the accomplished teachers who labor in those positions, we are under many obligations, for every College owes its grade in scholarship and the intellectual developement of its graduates very materially, to the character of the primary instruction among its patrons.

Course of Instruction.

FRESHMAN CLASS.

FIRST TERM.—Ovid; Virgil's *Bucolics*; Greek Reader; Arithmetic; English Literature; Algebra; Geography; Mythology.

SECOND SESSION.—Virgil's *Aeneid*, six books; *Anabasis* and Testament; Algebra; Geometry; English Literature; Geography and History; Book Keeping.

SOPHOMORE CLASS.

FIRST TERM.—Sallust; Cicero's Orations; Herodotus; Geometry, English Literature; Antiquities and History; Trigonometry.

SECOND TERM.—Livy and Cicero de *Officiis*; Homer's *Iliad*; Navigation, Surveying, &c.; Astronomy; Chemistry; Elocution; English Literature.

JUNIOR CLASS.

FIRST TERM.—Horace's Odes and Satires; Homer and Thucydides; Analytical Geometry; Uranography; Rhetoric; Natural Philosophy; French.

SECOND TERM.—Cicero De Oratore; Demosthenes; Differential and Integral Calculus; Botany; Logic; Agricultural Chemistry; French.

SENIOR CLASS.

FIRST TERM.—Tacitus; Sophocles; Mathematical Astronomy; Mental Philosophy; Geology and Mineralogy; Kames' Elements; French.

SECOND TERM.—Horace's Art of Poetry; Moral Philosophy; Political Economy; Butler's Analogy.

English Department.

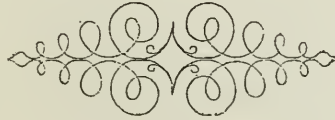

To MEET the wants and progressive spirit of the country, the Trustees have established an English Department, and prescribed the requisite course of study. Any student, by the consent of his parent or guardian, may enter as an irregular, and pursue such studies as he chooses; and those who fully complete the English Course, will receive Diplomas to that effect.

The large space allotted to studies of this description in the course, is proof of the estimation in which they are held, and of the attention bestowed on them. We hold it as a fixed principle, that a thorough knowledge of our own language, is an indispensable basis of genuine education, and that without English proficiency, classical attainments are of but little value. Orthography, Definition, Reading and Writing are made special exercises in all the Classics; while analysis of the best English authors, and Composition, are daily duties of every student. History and Historical Geography, are taught systematically; Rhetoric and Logic are studied theoretically and then applied in the analysis of every species of literary composition; Mental and Moral

Philosophy are completed by biographical and historical illustrations ; and Political Economy is studied with constant reference to Duties, Treaties of Commerce, Corporations, Patents, &c. Natural Philosophy is studied with constant reference to Machinery and the Mechanic Arts, and Chemistry, illustrated by the necessary experiments, will be completed by an Agricultural application with analysis of soils, manures, grain, &c. Young gentlemen who wish to pursue a partial course, or to pay special attention to some particular subject, will here find every facility afforded, and will at the same time have the advantage of College discipline and association.

NATURAL SCIENCE.

NATURAL PHILOSOPHY and Chemistry are illustrated and explained by regular lectures with a splendid Apparatus ; the student is not only made to understand these beautiful and useful sciences, but has them so impressed upon his mind, that he cannot easily forget them. Astronomy is illustrated by suitable instruments, and Geology, by an ample collection of specimens. A museum is in progress of formation that will be sufficient for the general purposes of Geology, Natural History, Botany, Anatomy, Physiology, &c.

English Course.

PREPARATORY.

ORTHOEPY; Orthography; Reading; Writing; Primary Geography; Oral and Written Arithmetic.

FRESHMAN CLASS.

FIRST TERM.—Arithmetic; English Grammar; Geography; Reading and Writing Exercises; Outlines of Natural Philosophy and Physiology.

SECOND TERM.—Arithmetic; English Grammar; Geography; Composition; Book Keeping; Natural Philosophy; History, United States.

JUNIOR CLASS.

FIRST TERM.—Punctuation; Prosody, and Poetry; Arithmetic in its applications; Natural Philosophy, general principles and applications; Geography with Globes and Drawing; Astronomy; Composition; Algebra.

SECOND TERM.—English Literature; Algebra; Chemistry; Geometry; Botany; Ancient History; Logic; Analytical Geometry; Elocution.

SENIOR CLASS.

FIRST TERM.—Geometry; Mental Philosophy; Trigonometry, Mensuration, Surveying and Navigation; Kames' Elements; Uranography; Hart's Constitution; Rhetoric; Integral and Differential Calculus.

SECOND TERM.—Political Economy; Agricultural Chemistry; Moral Science; Mechanics and Mathematical Astronomy; Butler's Analogy; Geology.

Text Books and Studies.

IN addition to the regular course, instruction is given in the Modern Languages, and Hebrew if desired, without extra charge. A supply of Books is kept at College for the accommodation of students; but, in order that persons wishing to supply themselves elsewhere, may know what books to select, the following partial list is subjoined:

Bullion's English, Latin and Greek Grammars; also, his Latin and Greek Readers, and Cæsar; Emerson's series of Arithmetic; Mitchell's Geography; Frost's United States History; Loomis' entire course of Mathematics; Comstock's Philosophy; Draper's Chemistry; Mattison's Astronomy; Olmstead's Mechanics; Blair's Rhetoric; Kendall's Uranography; Mrs. Lincoln Phelps's Botany; Whaley's Logic; Upham's Mental Philosophy; Mather's Geology; Wayland's Political Economy.

Normal Department.

THE LEGISLATURE has created in this Institution a special organization for the instruction of Teachers; to give appropriate dignity and secure a grade sufficiently high for this Department, deemed so important to the welfare of the State, the Governor and Common School Superintendent were made *ex officio* officers of the Board of Trustees. As a public encouragement to young men to prepare in a State Institution specially organized for their instruction, the following enactment is found in the fourth section of the Charter:

SECTION IV.—*Be it further enacted*, That the Faculty and seven Trustees shall have power to grant CERTIFICATES, which shall exempt the bearer from examination by the County Committees throughout the State, and where Certificates are now, or may hereafter be demanded before paying out the public funds, a Certificate from Normal College shall answer in lieu thereof; they shall also have power to grant such Degrees and Marks of Honor as are given by Colleges and Universities generally.

This having been passed since the late School Law, is intended as a special honor for the professional Teacher, as well as the usual Collegiate Honors, for those who complete the regular course.

The Normal Department is needed more than any other; every County in the State needs from forty to one hundred teachers, and upon an average *four thousand* teachers are employed every year. These teachers are doing more for the weal or woe of North Carolina than any other class of men. Is one half of them sufficiently educated? No. If they have knowledge enough, do they know how to teach? Are Law, Medicine, and Divinity more easily learned than the proper manner of instructing and training the immortal mind? Does even a *finished* education make men safe Lawyers, Physicians, &c., without anything further? Are years of experience, profound learning, full courses of lectures and the accumulated wisdom of ages, necessary in administering medicine to the body? and shall the immortal part be given up to unlearned and unskilful instruction? *Teaching is a great profession*, it is now a profitable business; a splendid theatre of usefulness is open, and good actors are in great demand.

The members of the Normal Class are not only taught *what*, but *how* to teach; they are instructed in the proper method of teaching the different branches, the manner of conducting a school, the proper principles of school government, and every thing that tends to make them efficient and useful teachers. Attached to the College is a Model School of small children; in this school, the Normal candidates practice; here, under the inspection of the President, they

are drilled in all the minutiae of governing and teaching: here, also, talent for teaching is exemplified, and those who are found unsuitable for that profession, are not passed, and are persuaded to engage in some other pursuit. To young men who wish to prepare for the honorable and useful profession of teaching, this department offers every possible advantage; and it is hoped, that all who have the general cause of education at heart, will exert their influence to induce young men to enter, and prepare themselves for teaching our Common Schools.

Preparatory and Irregular Department.

THIS DEPARTMENT possesses superior advantages for those preparing for this or any other College. Such as desire a partial course, will enjoy all the privileges of Apparatus, Museum, Lectures and College associations, that any Institution can afford, without being confined to a course of instruction opposed to their purposes or opportunities. Those preparing for this Institution, will find this as cheap, as perhaps any school where appropriate instruction can be obtained; and therefore it will be advantageous for them to prepare here. Such as design entering the University or any other distant College, can prepare here as cheap, and certainly with more advantages, than at a common school; we, therefore, invite all who are preparing for College, to enter this Institution; assuring them that our advantages are not surpassed by any school.

TERMS AND VACATIONS.

THE year is divided into two terms; the first commencing on Wednesday, six weeks after the last Thursday in July, and continuing twenty-two weeks; the second commences after a vacation of two weeks and continues till the last Thursday in July, which is the annual COMMENCEMENT.

Expenses.

Tuition per session, Classical Course,	\$15 00
“ “ English Course,	12 00
“ “ Primary,	\$8 to 10 00
Board, washing, fuel, &c., per session,	30 00
Entire expenses per session,	\$38 to 45

The above includes all necessary expenses. There being no extras of any kind. This Institution has been organized upon the principle, that extravagance in youth, is not only a waste of fortune, but a serious impediment to moral and intellectual improvement; and we believe that the above prices are properly arranged to afford instruction of the highest grade, and board sufficiently good. If students come with a sufficiency of clothing, they will have no occasion whatever, for incidental expenses, except the very small amount required for Society and Commencement fees. Payment for Tuition and Board to be made invariably at the end of the session. Payment for books should be in advance.

Department, &c.

MUCH CARE is taken to guard and develop moral character; appropriate and regular Bible instruction is given, and every necessary means observed to cultivate the heart. We intend that no young man shall leave this Institution, worse in character than when he entered. Parents and Guardians need have no fears for their sons or wards. If they observe our regulations they must do well, and all who do not, are promptly and rigidly reported.

Boarding.

THE non-resident system has been adopted; the students board at large Hotels, subject to College regulations; or, at private boarding houses in the immediate vicinity of the Institution. Ample accommodations are provided for any number likely to attend.

General Information.

STUDENTS may enter at any time, and pay from the time of entering to the end of the term. No deduction is made for those who stay away a week or two after the term commences, and then join the regular classes; nor is allowance made in any case after entering, except for protracted sickness.

Students are not permitted to remain here unless they pursue a reasonable number of studies, and attend promptly to the ordinary College regulations; nor are they permitted to indulge in habits, contrary to morality, good order and genteel deportment. The Faculty are determined, that the College shall not be corrupted by idle or vicious members. Parents are invited to visit their sons at their rooms, recitations and studies, and inspect their progress, manners and accommodations. The friends of the students are earnestly advised, that much pocket money is unnecessary, and that extravagance in this respect, is injurious to all parties.

SOCIETIES, LIBRARIES, &c.

THE Literary Societies are in a flourishing condition, and afford every means for this species of improvement. Their Libraries are increasing rapidly, and will soon contain a complete variety of works on Biography, History, Philosophy, Poetry, Ancient and Modern Literature in general.

Location, Buildings. &c.

NORMAL COLLEGE is located in the Northwestern part of Randolph County, eighteen miles Southwest of Greensboro'; twenty miles Northwest of Ashboro', and sixteen miles nearly east of Lexington; one mile from the Fayetteville and Western Plank Road, and three miles from the Central Rail Road. Those coming by stage can procure conveyance to the College from Greensboro' by applying to Maj. GARRETT, or from Jamestown, by application to Dr. COFFIN.

A large College edifice is in progress, and other arrangements of the most ample character; so that in a short time, the accommodations will be equal to those of the oldest and best institutions in the country.

Those educating, or wishing to educate their daughters at Greensboro' Female College and other Female Seminaries in this vicinity, will perhaps, on several accounts, find it both convenient and agreeable to patronize Normal College.

Commencement for 1853.

THE BOARD OF TRUSTEES will meet on Wednesday the 27th of July.

On the 27th at eleven o'clock, Rev. COLIN MURCHISON, of Columbia, S. C., will preach the Valedictory Sermon to the Graduating Class, and on the same day, JOHN KERR, Esq., of Caswell County, N. C., will deliver the Annual Address before the Literary Societies.

ANNUAL COMMENCEMENT on the 28th. The corner stone of the new College will be laid with Masonic honors, at nine o'clock, and Commencement Exercises will begin at ten o'clock.

Executive Committee.

His Excellency DAVID S. REID, *Chairman*,
REV. B. CRAVEN,
JAMES LEACH, Esq.,
JOSEPH JOHNSON, Esq.,
AHI ROBBINS, Esq.,
J. P. H. RUSS, Esq.,
J. W. THOMAS, Esq.,
S. G. COFFIN, M. D.

Faculty.

REV. B. CRAVEN, A. M., PRESIDENT,
PROFESSOR OF ANCIENT LANGUAGES AND NORMAL DEPARTMENT.

W. MACK. ROBBINS, A. B.,
PROFESSOR OF MATHEMATICS.

REV. A. S. ANDREWS,
PROFESSOR OF ENGLISH LITERATURE AND MORAL SCIENCE.

PROFESSOR OF EXPERIMENTAL SCIENCE.

LEMUEL JOHNSON, A. B., TUTOR.

Under Graduates.

System of Studies.

PREPARATORY TO ADMISSION INTO NORMAL COLLEGE.

APPLICANTS for admission into the Freshmen Class, are required to stand an approved examination upon Oral and Written Arithmetic, the Grammars of the English, Latin and Greek Languages ; Latin Reader, Cæsar, Greek Fables and Geography.

This is a small preparatory, and will in all cases be fully exacted ; it is not sufficient that the subjects be *passed* over, they must be *thoroughly understood*.

It might be supposed, since our preparatory is not so large as in some Institutions, that our collegiate course is less extensive than that of some other Colleges ; a view of the Course of Study, however, and of our Charter, will show that we rank with the very first State Institutions. Normal College is a regular State Institution, co-extensive with the University in all privileges, and State dignities.

We have made our preparatory small, purposely, and, as we think, for good and sufficient reasons.

If Colleges are designed to develope the intellect, and

organize and mature correct mental habits, it is evident their influences should be exerted before fixed habits and modes are formed; and it is equally evident, that acquiring the usual preparatory, forms the unalterable tendencies, and leaves the College the poor resource of merely *finishing* the work of a private school or academy. The American collegiate system is too faithful a copy of the European, when the students are sons of the aristocraey, attended by Tutors, and dependant upon the College for nothing but instruction in the form of lectures. Such is not our condition of society; and a change in collegiate theory, sentiment and practice, would evidently be beneficial. For those who are blessed with well educated parents, good tutors and every other requisite, such collegiate influence may be sufficient; but the great mass of our young men require other and different training.

The thousands of young men who leave American Colleges, ruined in fortune, body, mind and soul, *ought* to teach us, that ample endowments and learned professors, are not the only collegiate requisites.

Course of Instruction.

FRESHMAN CLASS.

FIRST TERM.

1. Ovid.
2. Virgil's *Bucolics*.
3. Greek Reader.
4. Arithmetic.
5. English Literature.
6. Algebra.
7. Historical Geography.
8. Mythology.

SECOND TERM.

9. Virgil's *Æneid*,
10. *Anabasis* and *Testament*.
11. Algebra.
12. Geometry.
13. English Literature.

Lectures during first term on Natural Philosophy ; and on Book Keeping during the second ; Composition every Monday.

SOPHOMORE CLASS.

FIRST TERM.

- 14. Sallust,
- 15. Cicero's Orations.
- 16. Herodotus.
- 17. Geometry.
- 18. Antiquities and History.
- 19. Algebraic Exercises.

SECOND TERM.

- 20. Livy.
- 21. Cicero de Officiis.
- 22. Homer's Iliad.
- 23. Trigonometry, Surveying, Navigation, &c.
- 24. Astronomy.
- 25. Elocution.

Lectures—First Term.—Natural History and Physiology.
Second Term.—Active Forces of Chemistry; Composition every Tuesday.

JUNIOR CLASS.

FIRST TERM.

- 26. Horace's Odes and Satires.
- 27. Terrence.
- 28. Homer.
- 29. Thucydides.
- 30. Analytical Geometry.
- 31. Uranography.
- 32. Rhetoric.
- 33. Mechanics.
- 34. French.

SECOND TERM.

- 35. Cicero de Oratore.
- 36. Juvenal.
- 37. Demosthenes.
- 38. Differential Calculus.
- 39. Integral Calculus.
- 40. Botany.
- 41. Logic.
- 42. French.

Lectures—First Term.—Chemistry and Geology. Second Term.—Agricultural Chemistry and Mineralogy, Thesis on Translation every Wednesday.

SENIOR CLASS.

FIRST TERM.

- 43. Tacitus.
- 44. Sophocles.
- 45. Mathematical Astronomy.
- 46. Mental Philosophy.
- 47. Kames' Elements.
- 48. French.
- 49. Engineering.

SECOND TERM.

- 50. Horace's Art of Poetry.
- 51. Moral Philosophy.
- 52. Political Economy.
- 53. Butler's Analogy.

Lectures—First Term—Psychology and Evidences of Christianity. Second Term.—International Law.

The Class, during the year, reviews the principal studies in the whole course.

English Department.

TO MEET the wants and progressive spirit of the country, the Trustees have established an English Department, and prescribed the requisite course of study. Any student, by the consent of his parent or guardian, may enter as an irregular, and pursue such studies as he chooses; and those who fully complete the English Course, will receive Diplomas to that effect.

The large space allotted to studies of this description in the course, is proof of the estimation in which they are held, and of the attention bestowed on them. We hold it as a fixed principle, that a thorough knowledge of our own language, is an indispensable basis of genuine education, and that without English proficiency, classical attainments are of but little value. Orthography, Definition, Reading and Writing are made special exercises in all the Classics: while analysis of the best English authors, and Composition, are daily duties of every student. History and Historical Geography, are taught systematically; Rhetoric and Logic are studied theoretically and then applied in the analysis of every species of literary composition: Mental and Moral Philosophy are completed by biographical and historical

illustrations; and Political Economy is studied with constant reference to Duties, Treaties of Commerce, Corporations, Patents, &c. Natural Philosophy is studied with constant reference to Machinery and the Mechanic Arts, and Chemistry, illustrated by the necessary experiments, will be completed by an Agricultural application with analysis of soils, manures, grain, &c. Young gentlemen who wish to pursue a partial course, or to pay special attention to some particular subject, will here find every facility afforded, and will at the same time have the advantage of College discipline and association.

NATURAL SCIENCE.

NATURAL PHILOSOPHY and Chemistry are illustrated and explained by regular lectures with a splendid Apparatus; the student is not only made to understand these beautiful and useful sciences, but has them so impressed upon his mind, that he cannot easily forget them. Astronomy is illustrated by suitable instruments, and Geology, by an ample collection of specimens. A Museum is in progress of formation that will be sufficient for the general purposes of Geology, Natural History, Botany, Anatomy, Physiology, &c.

Normal Department.

THE LEGISLATURE has created in this Institution a special organization for the instruction of Teachers; to give appropriate dignity and secure a grade sufficiently high for this Department, deemed so important to the welfare of the State, the Governor and Common School Superintendent were made *ex officio* officers of the Board of Trustees. As a public encouragement to young men to prepare in a State Institution specially organized for their instruction, the following enactment is found in the fourth section of the Charter :

SECTION IV.—*Be it further enacted*, That the Faculty and seven Trustees shall have power to grant CERTIFICATES, which shall exempt the bearer from examination by the County Committees throughout the State, and where Certificates are now, or may hereafter be demanded before paying out the public funds, a Certificate from Normal College shall answer in lieu thereof; they shall also have power to grant such Degrees and Marks of Honor as are given by Colleges and Universities generally.

This having been passed since the late School Law, is intended as a special honor for the professional Teacher, as well as the usual Collegiate Honors, for those who complete the regular course.

The Normal Department is needed more than any other; every County in the State needs from forty to one hundred teachers, and upon an average *four thousand* teachers are employed every year. These teachers are doing more for the weal or woe of North Carolina than any other class of men. Is one half of them sufficiently educated? No. If they have knowledge enough, do they know how to teach? Are Law, Medicine, and Divinity more easily learned than the proper manner of instructing and training the immortal mind? Does even a *finished* education make men safe Lawyers, Physicians, &c., without any thing further? Are years of experience, profound learning, full courses of lectures and the accumulated wisdom of ages, necessary in administering medicine to the body? and shall the immortal part be given up to unlearned and unskilful instruction? *Teaching is a great profession*, it is now a profitable business; a splendid theatre of usefulness is open, and good actors are in great demand.

The members of the Normal Class are not only taught *what*, but *how* to teach; they are instructed in the proper method of teaching the different branches, the manner of conducting a school, the proper principles of school government, and every thing that tends to make them efficient and useful teachers. Attached to the College is a Model School of small children; in this school, the Normal candidates practice; here, under the inspection of the President, they are drilled in all the minutiae of governing and teaching;

here, also, talent for teaching is exemplified, and those who are found unsuitable for that profession, are not passed, and are persuaded to engage in some other pursuit. To young men who wish to prepare for the honorable and useful profession of teaching, this department offers every possible advantage; and it is hoped, that all who have the general cause or education at heart, will exert their influence to induce young men to enter, and prepare themselves for teaching our Common Schools.

The full course of study in this Department, requires three years for its completion: those who stand an approved examination upon the first year's course, will receive a State Certificate, which will exempt them from examination for one year thereafter; those who stand upon the two year's course, will receive a Certificate for two years; and those who pass upon the entire course, will be graduated as Teachers.

COURSE OF INSTRUCTION IN THE NORMAL DEPARTMENT.

FIRST YEAR.

ORTHÆPY, Orthography, Reading, Writing, Arithmetic, Geography, English Grammar, Natural Philosophy, Book Keeping and History United States of America.

Lectures—Mode of conducting and teaching school, with practice every week in the Model School.

SECOND YEAR.

English Literature, Arithmetic, Natural Philosophy, Algebra, Astronomy, Geometry, Botany, History, Elocution, Physiology.

Lectures as above, with composition every week.

THIRD YEAR.

Geometry, Mental Philosophy, Logic, Chemistry, Uranography, Rhetoric, Trigonometry, Surveying, Mensuration, Political Economy, Moral Science and Geology.

With regular Normal Lectures, and a general review of the whole course.

Indigent young men, who can bring a certificate of good natural capacity and moral character, will be prepared for Teachers upon credit.

Preparatory and Irregular Department.

THIS DEPARTMENT possesses superior advantages for those preparing for this or any other College. Such as desire a partial Course, will enjoy all the privileges of Apparatus, Museum, Lectures and College associations, that any Institution can afford, without being confined to a course of instruction opposed to their purposes or opportunities. Those preparing for this Institution, will find this as cheap, as perhaps any school where appropriate instruction can be obtained, and therefore it will be advantageous for them to prepare here. Such as design entering the University or any other distant College, can prepare here as cheap, and certainly with more advantages, than at a common school; we, therefore, invite all who are preparing for College, to enter this Institution; assuring them that our advantages are not surpassed by any school.

TERMS AND VACATIONS.

THE year is divided into two terms; the first commencing on Wednesday, six weeks after the last Thursday in July, and containing twenty-two weeks; the second commences after a vacation of two weeks and continues till the last Thursday in July, which is the ANNUAL COMMENCEMENT.

Text Books and Extra Studies.

IN addition to the regular course, instruction is given in the Modern Languages, and Hebrew if desired, without extra charge. A supply of Books is kept at College for the accommodation of students; but, in order that persons wishing to supply themselves elsewhere, may know what books to select, the following partial list is subjoined:

Bullion's English, Latin and Greek Grammars; also, his Latin and Greek Readers, and Cæsar; Emerson's series of Arithmetic; Mitchell's Geography; Frost's United States History; Loomis' entire course of Mathematics; Comstock's Philosophy; Draper's Chemistry; Mattison's Astronomy; Olmstead's Mechanic's; Blair's Rhetoric; Kendall's Uranography; Mrs. Lincoln Phelps's Botany; Whaley's Logic; Upham's Mental Philosophy; Mather's Geology; Wayland's Political Economy.

Expenses.

Tuition per session, Classical Course,	\$15 00
“ “ English Course,	12 00
“ “ Primary,	\$8 to 10 00
Board, washing, fuel, &c., per session,	30 to 35
Entire expenses per session,	38 to 50

The above includes all necessary expenses. There being no extras of any kind. This Institution has been organized upon the principle, that extravagance in youth, is not only a waste of fortune, but a serious impediment to moral and intellectual improvement; and we believe that the above prices are properly arranged to afford instruction of the highest grade, and board sufficiently good. If students come with a sufficiency of clothing, they will have no occasion whatever, for incidental expenses, except from two to five dollars per annum for Society and Commencement fees. Payment for Tuition and Board to be made invariably at the end of the session. Payment for books should be in advance.

Each class will be required to keep their room in good order, and repair all damages; and each student is required to pay one dollar as a Matriculation fee, at the time of entering.

Department, &c.

MUCH care is taken to guard and develope moral character ; appropriate and regular Bible Instruction is given, and every necessary means observed to cultivate the heart. We intend that no young man shall leave this Institution, worse in character than when he entered. Parents and Guardians need have no fears for their sons or wards. If they observe our regulations they must do well, and all who do not, are promptly and rigidly reported.

Regular reports will be sent to Parents and Guardians every six weeks.

Boarding.

THE non-resident system has been adopted; the students board at large Hotels, subject to College regulations: or, at private boarding houses in the immediate vicinity of the Institution. Ample accommodations are provided for any number likely to attend. A large number of rooms will be completed in a short time, for those who may choose to furnish for themselves. Those who choose to avail themselves of these rooms, need not expend more than from \$5 to 6 per month, for board, washing, &c.

General Information.

STUDENTS may enter at any time, and pay from the time of entering to the end of the term. No deduction is made for those who stay away a week or two after the term commences, and then join the regular classes; nor is allowance made in any case after entering, except for protracted sickness.

Students are not permitted to remain here unless they pursue a reasonable number of studies, and attend promptly to the ordinary College regulations; nor are they permitted to indulge in habits, contrary to morality, good order and genteel deportment. The Faculty are determined, that the College shall not be corrupted by idle or vicious members. Parents are invited to visit their sons at their rooms, recitations and studies, and inspect their progress, manners and accommodations. The friends of the students are earnestly advised, that much pocket money is unnecessary, and that extravagance in this respect, is injurious to all parties.

SOCIETIES, LIBRARIES, &c.

THE Literary Societies are in a flourishing condition, and afford every means for this species of improvement. Their Libraries are increasing rapidly, and will soon contain a complete variety of works on Biography, History, Philosophy, Poetry, Ancient and Modern Literature in general.

Location Buildings, &c.

NORMAL COLLEGE is located in the Northwestern part of Randolph County, eighteen miles Southwest of Greensboro'; twenty miles Northwest of Ashboro', and sixteen miles nearly east of Lexington; one mile from the Fayetteville and Western Plank Road, and three miles from the Central Rail Road. Those coming by the eastern stage can procure conveyance to the College from Greensboro' by applying to Maj. GARRETT, or from Jamestown, by application to Dr. COFFIN. A tri-weekly stage from Warsaw, via Fayetteville, to Salem, passes within two miles of the College. Stop at Hunt's.

A large College edifice is in progress, and other arrangements of the most ample character; so that in a short time, the accommodations will be equal to those of the oldest and best institutions in the country.

Those educating, or wishing to educate their daughters at Greensboro' Female College and other Female Seminaries in this vicinity, will perhaps, on several accounts, find it both convenient and agreeable to patronize Normal College.

Commencement for 1854.

ON WEDNESDAY, July 26, at ten o'clock A. M., Rev. S. M. FROST, of Fayetteville, will preach the Valedictory Sermon to the Graduating Class; and on the same day at three o'clock, P. M., R. P. DICK, Esq., of Greensborough, will deliver the Annual Address before the Literary Societies.

The exercises of the Annual Commencement will begin at ten o'clock on Thursday the 27th.

The Trustees will meet on the 26th, at one o'clock, P. M.

Freshmen, Sophomores and Juniors will declaim on Monday, Tuesday and Wednesday evenings.

The Fall Session will commence on Wednesday the 13th of September.

* Deficient in one or more studies.

† Irregular in Greek.

SYSTEM OF STUDIES.

PREPARATORY TO ADMISSION.

Applicants for admission into the Freshman Class, are required to stand an approved examination upon Oral and Written Arithmetic; the Grammars of the English, Latin, and Greek Languages; Latin Reader; Cæsar; Greek Fables; and Geography.

Thorough preparation on the above, will be much more acceptable, and will insure higher standing, than further advancement in some studies, whilst some of these are neglected. Successful Collegiate training demands accurate elementary preparation.

COURSE OF INSTRUCTION.

FRESHMAN CLASS.

FIRST TERM.

Ovid.		Arithmetic.
Greek Reader.		English Literature.

During this term the Class is drilled closely on general construction in the Languages, and on Latin Prosody: the applications of Arithmetic are studied minutely; also the construction and Prosody of the English Language: daily practice is demanded in Penmanship; and a lecture is given every Saturday morning on Natural Philosophy. Composition every Monday.

SECOND TERM.

Virgil's Bucolics and 2 Books of the Æneid.		Algebra, to Quadratics.
Anabasis, 2 Books.		Mythology.

Particular attention is paid to special constructions in the Languages, and to Mythological History in connection with Ancient Geography. Lectures, Saturday morning, on Book Keeping. Composition, on Monday.

THIRD TERM.

Virgil's *Æneid*, 4 Books.
Arabasis, 2 Books.

Algebra.
 Geometry, 6 Books.

Exercises in Writing, Latin, and Greek. Recitation every Saturday morning on the History of the United States. Composition as above.

SOPHOMORE CLASS.

FIRST TERM.

Sallust.
 Herodotus.

Geometry.
 Algebra.

Greek and Roman Antiquities.

Latin and Greek Idioms are closely studied and applied, and the connections of Algebra and Geometry. Lecture every Saturday on Natural History. Composition every Tuesday.

SECOND TERM.

Cicero's Orations and *De Officiis*.
 Homer, 3 Books.

Plane Trigonometry, Surveying,
 and Mensuration.

Astronomy.

Attention is paid to elegant translation in Latin, to Prosody in Greek, and to Mathematical applications. w Saturdays, Lectures on the Active Forces of Chemistry. Composition as above.

THIRD TERM.

Livy.
 Homer, 3 Books.

Navigation and Spherical Trigonometry.

English Literature.

Regular Translations in the Languages, with critical reference to their structure. Very special attention paid to English. Exercise every Saturday on Elocution. Composition as above.

JUNIOR CLASS.

FIRST TERM.

Horace's Odes and Terence.
 Thucydides.

Analytical Geometry.
 Rhetoric.

Latin Metre is now studied, and English composition of every kind receives the utmost attention. Lecture every Saturday on Chemistry: Composition every Wednesday.

SECOND TERM.

Horace and Juvenal.		Uranography.
Demosthenes on the Crown.		Logic.
Differential Calculus.		French.

Elegance in Greek Translation; general history of emblems as connected with Uranography; Lecture every Saturday on Geology and Mineralogy; Composition as above.

THIRD TERM.

Cicero De Oratore.		Integral Calculus.
Greek Testament and Reviews.		Botany.
		French.

Close attention is paid to critical readings in the Languages, and to the connections and relations of Mathematics. Saturday, Lecture on Agricultural Chemistry. Composition as above.

SENIOR CLASS.

FIRST TERM.

Tacitus and Horace's Art of Poetry.		Mathematical Astronomy.
Sophocles.		Mental Philosophy.
		French.

The class critically reviews the construction of the Languages. The course of Lectures on Mental Philosophy requires extensive reading and writing by the class. Thesis every two weeks.

SECOND TERM.

Political Economy.		Languages and Mathematics.
Mechanics and Civil Engineering.		French.

Five lectures are delivered every week on Political Economy, embracing National and Constitutional Law, Treaties, &c. Regular reviews on the whole course of Languages and Mathematics are had daily.

THIRD TERM.

Moral Philosophy.		Evidences of Christianity.
		Philosophy of History.

The Lectures during this Term are extensive, and require the class to read largely. Thesis or Translation every week.

All the classes declaim once in four weeks; each will attend a Bible recitation every Sabbath morning, and the lower classes have regular reading exercises. Hebrew, Italian, and Spanish are studied by those who desire it, without extra charge.

ENGLISH COURSE.

This course usually requires about three years, and those who properly complete it receive an English Diploma. Young gentlemen desiring to pursue such a course, will perhaps find as many facilities at Normal College as at any other establishment.

APPARATUS.

We have a very fine and extensive Apparatus, made by Chamberlain & Ritchie of Boston, together with an ample collection of minerals and Geological specimens. We will also thank any person to collect specimens for us, and will pay him a reasonable price.

NORMAL DEPARTMENT.

Attached to the College is a department for the instruction of Teachers. The Trustees conceived, that whilst very many Colleges had departments of Law and Medicine for such as desired that kind of instruction, a provision for the education of Teachers was greatly needed in this State. Such a department has been established on a liberal scale, though for want of proper accommodations it has not been fully carried into effect. The exercises of the department, with complete arrangements, will commence next session. The following is the Legislative authority given to the College in this respect:

SECTION IV.—*Be it further enacted*, That the Faculty and seven Trustees shall have power to grant CERTIFICATES, which shall exempt the bearer from examination by the County Committees throughout the State, and where Certificates are now, or may hereafter be demanded before paying out the public funds, a Certificate from Normal College shall answer in lieu thereof; they shall also have power to grant such Degrees and Marks of Honor as are given by Colleges and Universities generally.

Such students as desire to prepare for Teaching, will be fully instructed in all matters pertaining to teaching and conducting schools; they will be more thoroughly prepared on the studies usually taught, and will be practically exercised in a Model School opened for that purpose. We beg leave to assure the public, that implicit reliance may be placed upon any young man having

a Normal Certificate, dated after this year. As Teachers are greatly needed, and we are establishing a Normal department on the most approved plan, we hope the country will do us the favor to give us a trial. Any young man desirous to prepare for teaching, though unable to pay his expenses, would do well to address the President of the College.

PARTIAL COURSE.

As very many young men wish to spend one or more sessions at some institution of high grade, they are invited to examine our accommodations and advantages. Such will be cordially received, and all reasonable efforts will be made to render their stay here both pleasant and profitable.

They will enjoy all the privileges of the regular classes.

PREPARATORY.

Our Preparatory Department is directly under the supervision of the Faculty; the recitations are all in the College buildings, and all meet together for Religious exercises in the College Chapel. The President will personally attend to the Preparatory as well as other students, manage their expenses, take care of their manners and morals, and use every proper means to execute the will of parents and guardians. Our friends may be assured that their sons, large or small, will receive careful attention. For citizens of the low country wishing to send their small boys to school, we think our Institution has some advantages.

PLACE AND MODE OF STUDY.

College duties commence at 8 o'clock in the morning, and continue till 12; and from half-past 1 till 5 in the afternoon in the summer, and from 1 till 4 in the winter.

During these hours all students stay in the College buildings, or in rooms upon the College grounds, each class in a separate room or rooms, each student having a good chair and desk to himself, and all required to be perfectly silent and attentive to their studies. We think this arrangement much better than allowing students to remain in their private rooms, at a distance from the College, during school hours.

At candle-lighting the bell rings for study, and each student is required to be in his room on the College grounds, or at his boarding-house, for the re-

mainder of the evening. By this arrangement our students attend promptly to their duties, and avoid disorderly conduct generally.

School is opened every morning by reading the Bible and prayer, at which time also the roll is called, and all strictly required to be present.

Each student is required to recite at least three times daily, and may recite as often as six times if he chooses, and is able to maintain his position in the classes.

MERITS AND DEMERITS.

A regular account is kept by the Faculty against each student as to merits and demerits, and by them regular reports are made to the President.

For every recitation the student receives from 1 to 8 according to his efficiency; for attendance at all other exercises from 8 to 16; and for composition and declamation from 1 to 64.

For absence from the roll-call, from recitation, and for ordinary violations of any and all regulation, he receives 8 demerits each. For absence or failure in composition or declamation, he receives 64 demerits.

For misdemeanors of a higher kind, the President affixes demerits according to the offense. So soon as any student's demerits amount to 300, his parent or guardian is informed thereof, and when he has received 500 he is suspended.

For *swearing, gambling, or drinking any intoxicating liquors*, expulsion is the penalty for the first offence.

All excused absences receive no demerits, but subtract from the grade the merit that might have been obtained. Ninety per centum of the highest possible number in any class, will entitle the student to first distinction; 80 per centum, second distinction; 70 per centum, third distinction; and less than 50 per centum will be a cause of disapproval.

EXPENSES.

Tuition, per Term,	- - - - -	\$10
Tuition in Preparatory, per Term,	- - - - -	\$7 to \$10
Board, Washing, Fuel, &c., per Term,	- - - - -	\$23 to \$29

The above includes the whole expenses generally embraced in board and tuition, except that the student finds his own candles.

Fifty students can be furnished with rooms upon the college grounds at the following rates per Term :

Board,	- - - - -	\$20
Washing,	- - - - -	2
Room-rent,	- - - - -	5

The rooms will be furnished with ordinary furniture, and the student will furnish his own fuel, which, during the winter Term, will cost him about \$2. The student may find the furniture for his room; in which case the rent will be only \$3 per Term. There are besides these rooms, four regular boarding-houses at the College, and a number of private boarding-houses, both at the College and in the immediate vicinity.

Parents and guardians may select board; or, if left to us, we will execute their instructions.

As the arrangement of students at their boarding-houses is of great importance, both to themselves and the College, none under age will be allowed to change during the Term, without the express permission of parent, guardian, or the President of the College.

To defray the expenses of sweeping, fire-making, bell-ringing, &c., each student will pay \$1 at the first of each Term. Society expenses, including a Commencement fee of \$2.50, are about \$5 per annum. All damages to College or premises, will be repaired at the expense of the damager; and each class must leave its room in as good condition as when received.

These are absolutely every item of expense, general and incidental; and \$125, if sent to the President, will be acknowledged by a receipt in full for three terms, or one year, whilst the expense may be as low as \$90.

Clothing can be provided at the Institution; but will be better furnished from home—plain and cheap.

If provisions should return to their usual prices, expenses will be greatly diminished.

GENERAL INFORMATION.

Students may enter at any time, and pay from the time of entering to the end of the term. No deduction is made for those who stay away a week or two after Term commences, and then join the regular classes; nor is allowance made in any case after entering, except for protracted sickness.

Students are not permitted to remain here unless they pursue a reasonable number of studies, and attend promptly to the ordinary College regulations; nor are they permitted to indulge in habits contrary to morality, good order, and genteel deportment. The Faculty are determined that the College shall not be corrupted by idle or vicious members. Parents are invited to visit their sons at their rooms, recitations, and studies, and inspect their progress, manners, and accommodations. The friends of the students are earnestly advised that much pocket-money is unnecessary, and that extravagance in this respect is injurious to all parties.

SOCIETIES, LIBRARIES, &C.

The Literary Societies are in a flourishing condition, and afford every means for this species of improvement. Their Libraries are increasing rapidly, and will soon contain a complete variety of works of Biography, History, Philosophy, Poetry, and Ancient and Modern Literature in general.

TEXT BOOKS AND EXTRA STUDIES.

A supply of Books is kept at College for the accommodation of students; but, in order that persons wishing to supply themselves elsewhere, may know what books to select, the following partial list is subjoined :

Bullion's English, Latin and Greek Grammars ; also, his Latin and Greek Readers, and Caesar ; Emerson's series of Arithmetic ; Mitchell's Geography ; Frost's United States History ; Loomis's entire course of Mathematics ; Comstock's Philosophy ; Draper's Chemistry ; Mattison's Astronomy ; Olmstead's Mechanics ; Blair's Rhetoric ; Kendall's Uranography ; Mrs. Lincoln Phelps's Botany ; Whaley's Logic ; Upham's Mental Philosophy ; Mather's Geology ; Wayland's Political Economy.

Such as wish to send both sons and daughters to school in the same neighbourhood, will find an excellent Female Seminary at Glen Anna, five miles from the College, very cheap, and well conducted.

TERMS AND VACATIONS.

✓ The Collegiate year is divided into three Terms ; the first begins on Wednesday seven weeks after Commencement, and continues fourteen weeks ; the second begins on the first Monday in January ; and the third begins fifteen weeks thereafter. Each Term continues fourteen weeks. At the end of the first, two weeks are allowed for Christmas holydays, and one week is given at the end of the second Term.

All bills for Board, Tuition, and Books must be paid at the end of each Term.

COMMENCEMENT FOR 1855.

July 15. At 11 o'clock, A. M., Rev. W. S. Chaffin, of Newberne, preached the dedicatory Sermon in the new College Chapel.

July 16. Examinations; Freshmen Declaimed in the evening.

July 17. Junior Examination; Sophomore Declamation in the evening.

July 18. At 10 o'clock, Rev. W. Closs, of the North Carolina Conference, preached the valedictory sermon; and at 3 o'clock P. M., M. J. McDuffie, Esq., of Fayetteville, delivered the Address before the Societies; Junior Orations in the evening.

July 19. COMMENCEMENT Exercises began at 10 o'clock, and at the close Rev. Dr. Deems delivered the Baccalaureate Address to the Graduating Class.

General Remarks.

The Trustees of Normal College desire fully and fairly to exhibit the character of their Institution, and assure all whom it may concern, that every iota will be found as stated in this Catalogue.

1. The College grew from a small Academy: the President of the College has been here as Principal or President for thirteen years: his administration and literary character are well known by the country generally. The other members of the Faculty are graduates of distinction, and of some experience.

2. Our chartered privileges and powers are the same as those of State Institutions generally. Our course of study, which is rigidly and fully exacted, will speak for itself: and though the preparatory is smaller than at some other places, the whole course is inferior to few.

3. In a few weeks our third class will graduate: all departments are fully organized, and the regular routine of business in full operation.

4. We have *at last* completed our new College edifice—a substantial brick building, 100 feet long, 50 feet wide, and three stories high. The entire building is devoted to recitation rooms, society halls, laboratory, museum, &c. In this respect we have every desirable accommodation.

5. We have boarding-rooms upon the College grounds, good public and private boarding-houses, and can meet every reasonable requisition.

6. So soon as the Central Railroad is completed, a daily hack will run from High Point Station to the College—a distance of four miles.

7. We respectfully solicit all who fear to send their sons to a distant school, or who fear college dissipation, to try Normal.

8. The sums mentioned on another page will absolutely cover *every* expense, and all cash, for pocket-money and otherwise, should be deposited in the hands of the President, *if economy is desired*.

C. H. WILEY, “	DR. J. E. ROUNSAVILLE.
L. BLACKMER, “	

ANNUAL COMMENCEMENT JULY 17, 1856.

The Valedictory Sermon to the Graduating Class, will be preached on Wednesday, July 16, at 10 o'clock, by Rev. A. L. P. Green, D.D., of Nashville, Tenn.

The Address before the Societies will be delivered on the same day at 2 o'clock, P.M., by Hon. E. G. Reade, of Person, N. C.

Commencement exercises, Thursday morning, at 10 o'clock; and at the close, a Baccalaureate Address will be delivered by Rev. R. T. Heflin of Raleigh.

Faculty.

REV. B. CRAVEN, A.M., PRESIDENT,
And Professor of Mental and Moral Science.

L. JOHNSON, A.M.,
Professor of Mathematics.

I. L. WRIGHT, A.B.,
Professor of Ancient Languages.

Professor of English Literature.

Professor of Natural Science.

O. W. CARR,
Tutor of Languages.

J. H. ROBBINS,
Tutor of Mathematics.

Under Graduates.

Those only who sustain themselves are published as members of the regular classes; those marked deficient will be allowed to enter the next class in order by making up certain prescribed studies, and those who are too deficient to accomplish this, are placed in a class below or among the Irregulars. All who are not respectable scholars for the class are removed from it, but may enter it again by making up and standing a regular examination; this, however, is rarely done. The matriculations in the Freshman and Sophomore classes during the year, were more than double the number that remained after the testing, six weeks before Commencement.

* Deficient in one study. † Deficient in two or more.

ADMISSION INTO COLLEGE.

Students of any age will be received, and placed in such department and studies as their acquirements may justify. We have a Preparatory School directly under the supervision of the College Faculty; in this department suitable instruction is given for joining this or any other College; these pupils study in the College buildings, have good rooms, chairs, desks and such other arrangements as are necessary for pleasant and profitable study. We endeavor to combine the careful oversight, attention and sympathy of home-instruction, with the strictness and inciting influence of a public Institution. Those, however, who have boys that are idle and ungovernable at home, must not suppose that any Institution is a proper place to remedy such a neglect of parental discipline; it is a waste of time and money, and productive of much evil otherwise, to send boys to any public School or College for the purpose of moral reformation; from long and varied experience, we strenuously advise against such a course. Youths addicted to profanity, gambling, intoxication and other such immoralities, should never be sent to a College; for wherever such students abound, the contagion will spread in spite of all laws and regulations, and very few will have moral firmness sufficient to withstand the influence. Whatever wild and vicious youth goes to College, enters a broad road to ruin, and where many such are congregated, parents may justly tremble for the fate of the very best. Parents should not be deceived in this matter. Collegiate fame may cause the dissolute to enter for the purpose of acquiring a passport into good Society, and may also attract the worthy for the sake of distinction and respectability, but such a union is dangerous, as nothing can atone for a want of moral character. For these reasons we shall absolutely refuse to receive any but those of good moral character. We respectfully solicit the patronage of those who have moral and orderly sons or wards; we promise them the usual literary advantages, proper facilities for moral and religious improvement, and intercourse with such society as will be agreeable and profitable.

PREPARATORY STUDIES.

Applicants for admission into the Freshman Class, must stand an approved examination upon Oral and Written Arithmetic; the Grammars of the English, Latin and Greek Languages, Latin Reader, Cæsar and two Books of Ovid, Greek Reader and Geography. Thorough preparation on the above, will be much more acceptable, and will insure higher standing, than further advancement in some studies while these are neglected.

Course of Instruction.

FRESHMAN CLASS.

FIRST TERM.

1. *Latin*—Virgil, with special attention to Latin Construction and Prosody.
2. *Greek*—Anabasis; Construction and a careful review of the whole Grammar.
3. *Mathematics*—Algebra.
4. *English Literature*—embracing English Grammar, Prosody, Metres, Reading, Spelling, and Penmanship.

SECOND TERM.

1. *Latin*—Virgil, with Latin Construction, Mythology and Ancient Geography.
2. *Greek*—Anabasis.
3. *Mathematics*—Algebra and Geometry.
4. *Natural Science*—Natural Philosophy, with Lectures.
5. *English Literature*—Book Keeping and Composition.

THIRD TERM.

1. *Latin*—Cicero's Orations, with Arnold's exercises in Latin Composition.

2. *Greek*—Herodotus, with special exercises in Idioms and Greek Antiquities.
3. *Mathematics*—Algebra and Geometry.
4. *English Literature*—History of the United States and Composition.

SOPHOMORE CLASS.

FIRST TERM.

1. *Latin*—Sallust, with exercises in Latin Composition.
2. *Greek*—Homer, with close study of Particles and Idioms.
3. *Mathematics*—Trigonometry, Mensuration and Surveying, with practical exercises.
4. *Natural History*—Gould's Principles of Zoology, with Lectures.

SECOND TERM.

1. *Latin*—Cicero De Officiis and Terrence.
2. *Greek*—Homer, with Exercises in writing Greek.
3. *Mathematics*—Navigation, Spherical Trigonometry and Conic Sections.
4. *English Literature*—Comstock's Elocution, Astronomy and Composition.

THIRD TERM.

1. *Latin*—Livy—Lectures on Latin Literature.
2. *Greek*—Demosthenes on the Crown.
3. *Mathematics*—Analytical Geometry.
4. *English Literature*—Weber's Outlines of Universal History, Rhetoric with Lectures.

JUNIOR CLASS.

FIRST TERM.

1. *Latin*—Horace's Odes and Juvenal.
2. *Greek*—Thucydides—Exercises in writing Greek.
3. *Mathematics*—Differential Calculus.
4. *Rhetoric*—Blair, Whately and Campbell, with regular Exercises in English Composition.

SECOND TERM.

1. *Latin*—Cicero De Oratore—Translations into English.

2. *Greek*—Reviews.
3. *Mathematics*—Integral Calculus, and the formation of Tables.
4. *Logic*—Whately and Mill.
5. *Uranography*—Burrit's—Exercises with Globes.
6. *French*—Grammar and tables.

THIRD TERM.

1. *Latin*—The Satires of Horace.
2. *Greek*—The Ajax of Sophocles, Kuhner's Greek Grammar.
3. *Mathematics*—Olmstead's, Lardner's & Renwick's Mechanics, with Lectures.
4. *Natural Science*—Chemistry and Botany.
5. *English Literature*—History of the Middle Ages and Composition.
6. *French*—Charles XII. and Telemaque.

SENIOR CLASS.

FIRST TERM.

1. *Latin*—The Germania and Agricola of Tacitus.
2. *Greek*—Reviews and Exercise in Writing.
3. *Mathematics*—Mathematical Astronomy, and the History of Science with Lectures.
4. *Philosophy*—Upham and Reid on Mental Science with Lectures.
6. *French*.—Moliere.
7. Geology and Mineralogy.

SECOND TERM.

1. *Latin*—Cicero on the Immortality of the Soul.
2. *Greek*—Testament, Homer and Sophocles.
3. *Mathematics*—Astronomical Calculations, with Reviews on Algebra, Geometry and Trigonometry.
4. Political Economy, with Lectures on the Law of Nations, Constitution of the United States, &c.
5. Lectures on Modern Literature.

THIRD TERM.

1. *Latin and Greek*—Two recitations a week on such books as the Professor may select.
2. *Moral Science*—Wayland and Whewell, with Lectures.
3. *Mathematics*—Civil Engineering and Reviews.

4. *Evidences of Christianity*—Alexander, Paley and Butler.
5. Lectures on Natural Science and History.

LECTURES.

The following numbers will exhibit the lectures during the course; they embrace the most extensive investigation and illustrations of their subjects, and are delivered at stated times in connexion with recitations from the books.

4. Lectures on Mythology and Ancient Geography.
10. " on Natural Philosophy with Apparatus.
10. " on Natural History.
6. " on Latin Literature.
10. " on Rhetoric.
5. " on the formation of Mathematical Tables.
5. " on Uranography and the Globes.
10. " on the Laws of Motion and Mechanics.
30. " on Chemistry with Apparatus.
20. " on the History of Natural Science and Pure Mathematics.
26. " on Mental Philosophy.
18. " on Geology and Mineralogy.
12. " on the History of Physical Astronomy, embracing Sections of the Principia.
30. " on Political Economy, Law of Nations, &c.
10. " on Modern Literature.
30. " on Moral Science and the Evidences of Christianity.
15. " on various Scientific subjects.

RECITATIONS AND OTHER EXERCISES.

The Freshman Class has five recitations a week in Latin, five in Greek, and five in Algebra, throughout the year; four a week during the first term in English Literature; and four a week during the second and third terms in Geometry; one each week during the second term in Book Keeping, and during the third term the same, in History. One Composition each week throughout the year, one Lecture and one Composition each week during the second term, and six times during the year.

The Sophomore Class has four recitations each week in Latin, five in Greek and five in Mathematics during the whole year; three each week during the first term, in Natural Science, and during the second and third terms, three a week in English Literature; ten Lectures during the second term, and sixteen during the third; one Composition each week; Declamation four times and two original speeches, during the year.

The Junior Class has in each week during the first term, five recitations in Latin, four in Greek, four in Mathematics, three in Rhetoric, and one Composition each week during the second term, three in Latin, two in Greek, five in Mathematics, three in Logic, two in Uranography, three in French, and one Lecture. During each week of the third term, two in Latin, three in Greek, four in Mathematics, three in Natural Science, two in English Literature, three in French, and two Lectures. Composition every two weeks, Declamation three times and two original speeches during the year.

The Senior Class has in each week of the first term, three recitations in Latin, two in Greek, four in Mathematics, four in Mental Science, three in French, two in Geology and Mineralogy; two Theses, one original speech and seventy-four Lectures during the term. Weekly during the 2d term, two recitations each in Latin and Greek, 4 in Mathematics, 5 in Political Economy, & 2 in French,

4 Theses, 1 Speech, and 52 Lectures during the term. Weekly during the third term, Latin and Greek two recitations, four on Moral Science, 3 in Mathematics, two on the Evidences of Christianity, three Essays, and 65 Lectures, during the term.

ENGLISH COURSE.

This embraces all the studies of the Regular Course except Latin and Greek, and those who complete it will receive an English Diploma, with the Degree specified. Students in this course enjoy the same College privileges as others, and recite with the regular classes. For such as desire a complete English education without the classics, we have every reasonable facility; we think it very desirable to take the full course, but when this cannot be done, or is not preferred, we give such instruction and honors as other Institutions, that have adopted the English course of study.

PARTIAL COURSE.

As very many young men wish to spend one or more sessions at some institution of high grade, they are invited to examine our accommodations and advantages. Such will be cordially received, and all reasonable efforts will be made to render their stay here both pleasant and profitable.

PLACE AND MODE OF STUDY.

College duties commence at 8 o'clock in the morning, and continue till 12; and from half past 1 till 5 in the afternoon in the summer, and from 1 till 4 in the winter.

During these hours all students stay in the College buildings, or in rooms upon the College grounds, each class in a separate room or rooms, each student having a good chair and desk to himself, and all required to be perfectly silent and attentive to their studies. We think this arrangement much better than allowing students to remain in their private rooms; at a distance from the College, during school hours.

At candle-lighting the bell rings for study, and each student is required to be in his room on the College grounds, or at his boarding-house, for the remainder of the evening. By this arrangement our students attend promptly to their duties, and avoid disorderly conduct generally.

MERITS AND DEMERITS.

A regular account is kept by the Faculty against each student as to merits and demerits, and by them regular reports are made to the President.

For every recitation the student receives from 1 to 8 according to his efficiency; for attendance at all other exercises from 8 to 16; and for composition and declamation from 1 to 64.

For absence from the roll-call, from recitation, and for ordinary violations of any and all regulations he receives 8 demerits each. For absence or failure in composition or declamation, he receives 64 demerits.

For misdemeanors of a higher kind, the President affixes demerits according to the offence. So soon as any student's demerits amount to 300, his parent or guardian is informed thereof, and when he has received 500 he is suspended.

For *swearing, gambling, or drinking any intoxicating liquors*, expulsion is the penalty for the first offence.

All excused absences receive no demerits, but subtract from the grade the merit that might have been obtained. Ninety per centum of the highest possible number in any class, will entitle the student to first distinction; 80 per centum, second distinction; 70 per centum, third distinction; and less than 50 per centum will be a cause of disapproval; 95 per centum is necessary for first distinction in the Senior class.

APPARATUS.

We have a very fine and extensive Apparatus, made by Chamberlain & Ritchie of Boston, together with an ample collection of minerals and Geological specimens.

We will also thank any person to collect specimens for us, and will pay him a reasonable price.

EXPENSES.

Tuition, per term,.....	\$10 00
Tuition in Preparatory, per term,.....	\$7 to 10 00
Board, washing and fuel per month,....	7 50 to 8 00
Board alone per month of 30 days about.....	6 00

Boarding arrangements comprise a number of rooms on the College grounds, boarding houses and private families. Persons may select board for themselves, or if desired the President will attend to it for them. We intend as early as possible, to erect on the College premises proper buildings for the accommodation of a large number of students, and always to keep boarding expenses at the very lowest reasonable rate.

To defray the expenses of sweeping, fire-making, bell-ringing, &c., each student will pay \$1 at the first of each Term.

On first entering College, each student will pay \$5 as a deposit fee, and thereafter \$2.50 annually; this sum pays the fee for admission into the Societies, and the necessary Commencement expenses. These are absolutely all the items of necessary expense, general and incidental, and \$125 placed in the hands of the President will pay all expenses, exclusive of clothing and books, the expenses may be, however, less than \$100

Clothing can be provided at the Institution, but should be furnished from home—plain and cheap.

All moneys, drafts, &c., should be placed in the hands of the President, who attends to the payment of board, pays over to the students such pocket money as parents or guardians may direct, and renders a full account at the end of the Fall term, and at Commencement.

Parents and guardians in allowing pocket money, may remember that at this College, it is a mere indulgence and not at all necessary.

Students may enter at any time, and pay from the time of entering to January or Commencement; no allowance however, is made for those who stay away some time, and then join the regular classes.

EXAMINATION FOR ADMISSION.

The regular times for examining applicants are Monday and Tuesday preceding Commencement day, and Monday and Tuesday preceding the commencement of the Fall term. Candidates will be received into any class up to the third term of the Senior, by standing an approved examination upon the previous studies of the class; and students will be received at any time during the year, but the times above specified or the commencement of a term, are preferable.

DEGREES.

Before any student can graduate, he must complete the whole course of study, and must, during the last term of his Senior year, stand approved examinations upon every study in the Collegiate course; none will receive Diplomas but those who are really good scholars, and possess a good moral character. The Degree of A.M. may be conferred upon all regular graduates of three years standing, but will not follow as a matter of course; this Degree will be conferred upon none but such as sustain a fair Literary character, and exhibit moral and useful lives. The usual Honorary Degrees are conferred upon such persons as the Trustees may deem worthy.

LITERARY SOCIETIES.

There are two Literary Societies, with well furnished halls, good libraries, and all the usual facilities for improvement of this kind.

CALENDAR FOR 1856-'7.

September 17 First Term commences.
December 24 " " closes.
January 7 Second Term commences.
April 8 " " closes.
April 13 Third Term commences.
July 16 Commencement.

A daily Hack carries the mail and passengers, from Thomasville on the North Carolina Rail Road to the College.

All communications to be directed to "Normal College, N. C."

Indigent young men who can bring a good recommendation as to character and ability, will either receive Tuition gratis, or be indulged till they can earn the money after completing their education.

INSTRUCTOR IN NATURAL SCIENCE.

GRADUATES.

The Institution is young, having as yet graduated only four classes; the following exhibits the names and pursuits:

1853.

D. C. Johnson,	Member of the North Carolina Conference.
L. Johnson,	Professor in Normal College.

1854.

L. H. Carter,	Professor in Olin High School, N. C.
C. C. Cole,	Editor of the Times, Greensboro, N. C.
J. A. Edwards,	Farmer, Hookerton, N. C.
J. W. Pearson,	Member of the North Carolina Conference.
J. W. Payne,	Lawyer, Greensboro, N. C.
S. D. Peeler,	Member of the North Carolina Conference.
T. S. Whittington,	Principal of Oak Ridge Institute, N. C.
I. L. Wright,	Professor in Normal College.

1855.

J. W. Alsbaugh,	Lawyer & Editor of the Western Sentinel.
D. R. Bruton,	Principal of Franklin Academy, N. C.
Alson Fuller,	Physician, Science Hill, N. C.
J. S. Leach,	Physician, Leachburg, N. C.
H. T. Roper,	Extending his education by study & travel.
M. L. Wood,	Member of the North Carolina Conference.

1856.

R. F. Andrews,	Professor in Glenville High School, Ala.
L. Branson,	Principal of Lenoir Collegiate Inst., N. C.
E. Faw,	Lawyer, Marietta, Ga.
W. C. Gannon,	Member of the North Carolina Conference.
G. W. Hege,	Principal of Yaddin Institute, N. C.
J. E. Short,	Lawyer, Hamilton, N. C.
J. F. Smoot,	Member of the North Carolina Conference.
W. H. Weatherly,	Medical Student, Wilmington, N. C.

UNDER GRADUATES.

The classes are formed in the usual way at the commencement of each Collegiate year, and six weeks before Commencement all are subject to a re-classification very rigidly conducted; every one present or absent being classed according to his attainments at the time. Those who have not obtained a reasonable grade in their division, are placed in the next class below. The Catalogue does not show the matriculations in each class, but exhibits the position each student occupies at the end of the year.

SENIOR CLASS.

R. D. Best,	Darlington,	S. C.
W. W. Flood,	Henry County,	Va.
F. C. Fraizer,	Normal College,	N. C.
G. L. Hearn,	Holly Springs,	Miss.
J. S. Midyett,	Hyde County,	N. C.
L. R. Wright,	Darlington,	S. C.

JUNIOR CLASS.

C. C. Andrews,	Liberty County,	Ga.
S. J. Andrews,	Liberty County,	"
T. M. Anderson,	Halifax County,	Va.
B. B. Culbreth,	Cumberland County,	N. C.
J. M. Jones,	Person County,	"
A. P. Lecch,	Salisbury,	"
J. T. Lecch,	Johnson County,	"
A. Q. Moody,	Liberty County,	Ga.
N. Mc. R. Ray,	Bladen County,	N. C.
R. H. Skeen,	Randolph County,	"
W. W. Withers,	Stokes County,	"

SOPHOMORE CLASS.

L. W. Andrews,	Liberty County,	Ga.
R. R. Bradley,	Lexington,	S. C.
D. W. Boykin,	Johnson County,	N. C.
J. W. Cheatham,	Jefferson County,	Ga.
Walter Clark,	Beaufort County,	N. C.
P. N. Covington,	Richmond County,	"
*J. B. Choico,	Henry County,	Va.
W. P. Exum,	Goldsboro,	N. C.
E. H. Hines,	Bryan County,	Ga.
D. S. Latham,	Hyde County,	N. C.
J. S. LaPrade,	Chesterfield County,	Va.
R. D. McCotter,	Newberne,	N. C.
R. S. Small,	Normal College,	"
W. F. Watson,	Pittsylvania County,	Va.
*J. R. Winston,	Rockingham,	N. C.
W. C. White,	Normal College,	"

FRESHMAN CLASS.

W. A. Barrow,	Beaufort County,	N. C.
T. P. Barrow,	Beaufort County,	"
W. H. Bordon,	Goldsboro,	"
E. A. Boykin,	Johnson County,	"
W. J. Carman,	Green County,	"
H. L. Cobb,	Caswell County,	"
J. F. Clark,	Beaufort,	"
G. C. Dodson,	Patrick County,	Va.
W. R. Fortiscue,	Hyde County,	N. C.
J. D. Frost,	Davie County,	"
*J. P. Garner,	Lockland,	Ala.
H. H. Heptinstall,	Halifax County,	N. C.
J. A. Hudson,	Davie County,	"
R. H. Jones,	Jones County,	"
T. Lilly,	Montgomery County,	"
S. J. Litchfield,	Hyde County,	"
E. D. Lindsay,	High Point,	"
R. J. Lindsay,	High Point,	"
T. W. Mayhew,	Newberne,	"
*J. W. Simmons,	Currituck County,	"
E. D. Walsh,	Newberne,	"
J. A. Williamson,	Caswell County,	"
J. B. C. Wright,	Darlington,	S. C.
*J. A. Weston,	Hyde County,	N. C.
H. G. Whitehead,	Pitt County,	"

ENGLISH DEPARTMENT.

In the English Department there are two classes, *First* and *Second*, corresponding in English Studies, with Senior and Junior in the regular course.

FIRST CLASS.

J. M. Carter,	Williamsburg,	S. C.
T. W. Maultsby,	Bladen County,	N. C.

SECOND CLASS.

E. A. Armfield,	Union County,	N. C.
D. F. Armfield,	Union County,	"
T. B. Wright,	Duplin County,	"

REGULAR PREPARATORY No. 1.

Wm. Ayres,	Dauville,	Va.
E. T. Branch,	Halifax County,	N. C.
J. R. Branch,	Halifax County,	"
M. N. Brown,	Robeson County,	"

ADMISSION INTO COLLEGE.

Students of any age will be received, and placed in such department and studies as their acquirements may justify. We have a Preparatory School directly under the supervision of the College Faculty; in this department suitable instruction is given for joining this or any other College; these pupils study in the College buildings, have good rooms, chairs, desks and such other arrangements as are necessary for pleasant and profitable study. We endeavor to combine the careful oversight, attention and sympathy of home-instruction, with the strictness and inciting influence of a public Institution. Those, however, who have boys that are idle and ungovernable at home, must not suppose that any Institution is a proper place to remedy such a neglect of parental discipline; it is a waste of time and money, and productive of much evil otherwise, to send boys to any public School or College for the purpose of moral reformation; from long and varied experience, we strenuously advise against such a course. Youths addicted to profanity, gambling, intoxication and other such immoralities, should never be sent to a College; for wherever such students abound, the contagion will spread in spite of all laws and regulations, and very few will have moral firmness sufficient to withstand the influence. Whatever wild and vicious youth goes to College, enters a broad road to ruin, and where many such are congregated, parents may justly tremble for the fate of the very best. Parents should not be deceived in this matter. Collegiate fame may cause the dissolute to enter for the purpose of acquiring a passport into good society, and may also attract the worthy for the sake of distinction and respectability, but such a union is dangerous, as nothing can atone for a want of moral character. For

these reasons we shall absolutely refuse to receive any but those of good moral character. We respectfully solicit the patronage of those who have moral and orderly sons or wards; we promise them the usual literary advantages, proper facilities for moral and religious improvement, and intercourse with such society as will be agreeable and profitable.

PREPARATORY STUDIES.

Applicants for admission into the Freshman Class, must stand an approved examination upon *Spelling*; Oral and Written Arithmetic; the Grammars of the English, Latin and Greek Languages; Latin Reader; Cæsar; two books of Ovid; Virgil's *Bucolics*; Greek Reader; Algebra to equations of the Second Degree; and Modern Geography.

COURSE OF INSTRUCTION.

FRESHMAN CLASS.

FIRST TERM.

1. LATIN—Virgil, with special attention to Latin Construction and Prosody.
2. GREEK—Anabasis; Construction and a careful review of the whole Grammar.
3. MATHEMATICS—Algebra and Geometry.
4. ENGLISH LITERATURE embracing English Grammar, Prosody, Metres, Penmanship and Composition.

SECOND TERM.

1. LATIN—Virgil, with Latin Construction, Mythology and Ancient Geography.
2. GREEK—Anabasis.
3. MATHEMATICS—Algebra and Geometry.

4. NATURAL SCIENCE—Natural Philosophy, with Lectures.
5. ENGLISH LITERATURE—Book Keeping and Composition.

THIRD TERM.

1. LATIN—Cicero's Orations, with Arnold's exercises in Latin Composition.
2. GREEK—Herodotus, with special exercises in Idioms and Greek Antiquities.
3. MATHEMATICS—Algebra and Geometry.
4. ENGLISH LITERATURE—History of the United States and Composition.

SOPHOMORE CLASS.

FIRST TERM.

1. LATIN—Sallust, with exercises in Latin Composition.
2. GREEK—Homer, with close study of Particles and Idioms.
3. MATHEMATICS—Trigonometry, Mensuration, Surveying and Navigation, with practical exercises.
4. NATURAL HISTORY—Gould's Principles of Zoology, with Lectures.

SECOND TERM.

1. LATIN—Cicero De Officiis and Terrence.
2. GREEK—Homer, with Exercises in writing Greek.
3. MATHEMATICS—Spherical Trigonometry and Conic Sections.
4. ENGLISH LITERATURE—Comstock's Elocution, Astronomy and Composition.

THIRD TERM.

1. LATIN—Livy, Lectures on Latin Literature.
2. GREEK—Demosthenes on the Crown.
3. MATHEMATICS—Analytical Geometry.
4. ENGLISH LITERATURE—Wilson's Outlines of Universal History, with Lectures.

JUNIOR CLASS.

FIRST TERM.

1. LATIN—Horace's Odes and Juvenal.
2. GREEK—Thucydides, Exercises in writing Greek.
3. MATHEMATICS—Differential Calculus.
4. RHETORIC—Blair, Whately and Campbell, with regular Exercises in English Composition.

SECOND TERM.

1. LATIN—Cicero De Oratore, translations into English.
2. GREEK—Reviews.

3. MATHEMATICS—Integral Calculus, and the formation of Tables.
4. LOGIC—Whately and Mill.
5. URANOGRAPHY—Burrit's, exercises with Globes.
6. FRENCH—Grammar and Fables.

THIRD TERM.

1. LATIN—The Satires of Horace.
2. GREEK—The Ajax of Sophocles, Kuhner's Greek Grammar.
3. MATHEMATICS—Olmstead's, Lardner's & Renwick's Mechanics, with Lectures.
4. NATURAL SCIENCE—Chemistry and Botany.
5. ENGLISH LITERATURE—History of the Middle Ages and Composition.
6. FRENCH—Charles XII. and Telemaque.

SENIOR CLASS.

FIRST TERM.

1. LATIN—The Germania and Agricola of Tacitus.
2. GREEK—Reviews and Exercise in Writing.
3. MATHEMATICS—Mathematical Astronomy, and the History of the Science with Lectures.
4. PHILOSOPHY—Upham & Reid on Mental Science, with Lectures.
5. FRENCH—Moliere.
6. GEOLOGY AND MINERALOGY.

SECOND TERM.

1. LATIN—Cicero on the Immortality of the Soul.
2. GREEK—Testament, Homer and Sophocles.
3. MATHEMATICS—Astronomical Calculations, with Reviews on Algebra, Geometry and Trigonometry.
4. POLITICAL ECONOMY, with Lectures on the Law of Nations, Constitution of the United States, &c.
5. LECTURES ON MODERN LITERATURE.

THIRD TERM.

1. LATIN AND GREEK—Two recitations a week on such books as the Professor may select.
2. MORAL SCIENCE, with Lectures.
3. MATHEMATICS—Civil Engineering and Reviews.
4. EVIDENCES OF CHRISTIANITY—Alexander, Paley & Butler.
5. LECTURES ON NATURAL SCIENCE AND HISTORY.

LECTURES.

Several extensive and important series of Lectures are delivered to the different classes ; some are in connection with text books, apparatus, minerals, charts and other means of illustration ; others give more ample information and extend the range of thought far beyond such books as are usually placed in the hands of Students. These lectures have been procured with much labor and expense, and are designed with the study required, to effect as complete mental discipline and development, as the age, at which young men generally graduate, will possibly permit.

APPARATUS, MUSEUM, &c.

We have a very excellent Apparatus, made by Chamberlain & Ritchie, of Boston ; we are well prepared to give as ample instruction and illustration in the Natural Sciences and their applications, as Colleges are generally, or as any person could reasonably desire.

A very considerable Museum and Cabinet of minerals have been collected, embracing many rare and valuable Specimens ; but we regard our acquisitions thus far, as a mere beginning. All this country is immensely rich in such materials, and by proper exertions a cabinet could speedily be collected, that would equal the very best in the world. It is hoped that the friends of the College, both Ministers and Laimen, will collect a quantity in every community. Gather a sample of every kind ; do not suppose that any thing is *too common*. We will pay all expense of transportation. Many foreign minerals will be necessary to complete our collection, and these can readily be obtained so soon as we can offer good specimens in exchange. We specially want a large collection of fossils from the eastern countries ; these would be of great value to the Institution.

ENGLISH COURSE.

This embraces all the studies of the Regular Course except Latin and Greek, and those who complete it will receive an English Diploma, with the Degree specified. Students in this course enjoy the same College privileges as others, and recite with the regular classes. For such as desire a complete English education without the classics, we have every reasonable facility; we think it very desirable to take the full course, but when this cannot be done, or is not preferred, we give such instruction and honors as other Institutions, that have adopted the English course of study.

PARTIAL COURSE.

As very many young men wish to spend one or more sessions at some institution of high grade, they are invited to examine our accommodations and advantages. Such will be cordially received, and all reasonable efforts will be made to render their stay here both pleasant and profitable.

EXAMINATION FOR ADMISSION.

The regular times for examining applicants are Monday and Tuesday preceeding Commencement day, and Monday and Tuesday preceeding the commencement of the Fall term. Candidates will be received into any class up to the third term of the Senior, by standing an approved examination upon the previous studies of the class; and students will be received at any time during the year, but the times above specified or the commencement of a term, are preferable.

DEGREES.

Before any student can graduate, he must complete the whole course of study, and must, during the last term of his Senior year, stand approved examinations upon every study in the Collegiate course; none will receive

Diplomas but those who are really good scholars, and possess a good moral character. The Degree of A.M. may be conferred upon all regular graduates of three years standing, but will not follow as a matter of course; this Degree will be conferred upon none but such as sustain a fair Literary character, and exhibit moral and useful lives. The usual Honorary Degrees are conferred upon such persons as the Trustees may deem worthy.

REPORTS, MERITS, DEMERITS, &c.

Full reports are sent to parents and guardians six times during the year; a strict account of merits and demerits is kept with each Student, for all his recitations and College duties of every kind, and the result is faithfully marked on his report. To understand the reports, it must be observed that 100 is the highest number that can be obtained on any one study; first distinction requires an average of 95; second distinction 85, &c. Every Student must recite three times daily, and if his average grade does not exceed 50, he is removed to an other class or dismissed. Our patrons may be assured that the reports they receive are the *truth*, that they neither disguise nor palliate.

DISCIPLINE.

We have laws and regulations to which all are required to yield obedience, but we do not think that Students should be left to themselves and the *letter of the law*. We endeavor by all proper means, personal, public, religious and social, to make every one a useful man. No parent need suppose that his son is deprived of those warnings, admonitions and affectionate advice, which parental love so carefully administers; we continually use the whole power of kindness and sympathy, and by this means win many youths to excellence. But so soon as we are convinced that a Student *will not* do respectable

service, or *will be deteriorated* by remaining, we cause him to be taken home.

EXPENSES.

When our prices are compared with other Institutions, it should be remembered that we enter every item; that this Catalogue includes in the term "Board" not only *eating*, but furnished rooms, fuel, washing and every thing necessary, except candles. No more is necessary than the sums stated below, and if all monies are deposited with the President, (as should be done in every case) patrons will find their expenses within the limits stated. Pocket money at this College, means nothing but money to be spent for things having no reference to College matters in any way—but for things neither necessary nor useful.

Tuition per annum,.....	\$42
Regular Preparatory per annum,.....	\$36
Irregular and Primary,.....	\$30 to \$42
Board per annum,.....	\$75 to \$85
Total expense per annum,.....	\$105 to \$127
Or \$52.50 to \$63.50 per session of 5 months.	

To defray the expenses of sweeping, fire-making, bell-ringing and servant expenses generally, each Student pays \$1 at the first of each term. At the time of first entering, each Student pays \$5 for Society and Commencement expenses, and \$2.50 each year thereafter. In most cases, fifty cents per month can be saved by paying in advance. All damages to buildings, furniture or other property, will be repaired at the expense of the damager.

TERMS AND VACATION.

The Collegiate year is embraced in one session of ten months, with a holyday of two weeks at Christmas. Students can enter at any time, and pay from the time of entering to Christmas or Commencement. The year is divided into three terms of 14 weeks each, but this arrangement has reference only to grades and classifica-

tion. All bills not paid in advance, must be settled at Christmas, or Commencement.

The Session will henceforth begin on the first Wednesday of September, and Commencement will be on the fourth Thursday in June.

Students from the low country or from a great distance, can remain cheaply and pleasantly during vacation; this hill country abounds in all that is healthful, beautiful and pleasant; and the great mountain range of Western Carolina, mineral springs, grand scenery and scientific interest, is distant only a few hour's travel.

Next session will begin on the *second* wednesday in September.

LITERARY SOCIETIES.

There are two Societies, Columbian and Hesperian, with well furnished halls, valuable libraries, and all the usual facilities for improvement of this kind. These Societies have been distinguished from their origin, for their strict adherence to parliamentary rule, their support of College law, their high tone of character, and their eminent literary merit. They are zealously collecting chronicles, traditions and relies both of Revolutionary and Indian character, and deserve the co-operation of all who desire to see such mementoes of the past preserved and transmitted.

ANNUAL COMMENCEMENT, JULY 16, 1857.

Freshmen will declaim Monday evening, July 15; Sophomores, on Tuesday evening; and Juniors will deliver original orations on Wednesday evening.

The Valedictory Sermon to the Graduating Class, will be preached on Wednesday, July 15th, at 10 o'clock, by Rev. Charles P. Jones, of the North Carolina Conference.

The Address before the Societies will be delivered on the same day at 3 o'clock P. M., by W. Gilmore Simms, L.L.D., of S. C.

Commencement exercises, Thursday morning at 10 o'clock.

If patrons do not accompany their sons or wards, they should direct them to stop at Thomasville on the Rail Road, where they will find the College Hack every day except Sundays. On arriving at the College, they should immediately call at the College, and see the President before making any arrangements.

Faculty.

REV. B. CRAVEN, A. M., PRESIDENT,
Professor of Moral and Mental Science.

LEMUEL JOHNSON, A. M.,
Professor of Mathematics.

I. L. WRIGHT, A. M.,
Professor of Latin Language, and Modern History.

W. T. GANNAWAY, A. M.,
Professor of Greek Language, and Natural Philosophy.

O. W. CARR,
Tutor in Mathematics, and Ancient Languages.

J. H. ROBBINS,
Tutor in English Literature, and Natural Science.

Graduates.

The College was chartered in 1851, and graduated the first class in 1853. The following exhibits the names and pursuits of those who have received Diplomas.

1853.

D. C. JOHNSON, ...	Member of the North Carolina Conference.
L. JOHNSON, ...	Professor in Normal College.

1854.

L. H. CARTER, ...	Tutor in Emory and Henry College, Va.
C. C. COLE, ...	Editor of the Times, Greensboro, N. C.
J. A. EDWARDS, ...	Farmer, Hookerton, N. C.

L. R. WRIGHT, ...	Law Student, Darlington, S. C.

Under-Graduates.

The Classes are formed in the usual way, at the commencement of each collegiate year; and six weeks before Commencement all are subject to a re-classification, very rigidly conducted; every one present or absent being classed according to his attainments at the time. Those who have not obtained a reasonable grade in their division are placed in the next class below. The Catalogue does not show the matriculations in each class, but exhibits the position each student occupies at the end of the year.

Normal College.

ADMISSION INTO COLLEGE.

STUDENTS of any age will be received, and placed in such department and studies as their acquirements may justify. We have a Preparatory School, directly under the supervision of the College Faculty. In this department, suitable instruction is given for joining this or any other College. These pupils study in the College buildings, have good rooms, chairs, desks, and such other arrangements as are necessary for pleasant and profitable study. We endeavor to combine the careful oversight, attention, and sympathy of home instruction, with the strictness and inciting influence of a public institution. Those, however, who have boys that are idle and ungovernable at home, must not suppose that any institution is a proper place to remedy such a neglect of parental discipline; it is a waste of time and money, and productive of much evil otherwise, to send boys to any public school or college, for the purpose of moral reformation; from long and varied experience, we strenuously advise against such a course. Youths addicted to profanity, gambling, intoxication, and other such immoralities, should never be sent to a College; for wherever such students abound, the contagion will spread, in spite of all laws and regulations, and very few will have moral firmness sufficient to withstand the influence. Whatever wild and vicious youth goes to

CATALOGUE OF NORMAL COLLEGE.

College, enters a broad road to ruin ; and where many such are congregated, parents may tremble for the fate of the very best. Parents should not be deceived in this matter. Collegiate fame may cause the dissolute to enter for the purpose of acquiring a passport into good society ; and may also attract the worthy for the sake of distinction and respectability ; but such a union is dangerous, as nothing can atone for a want of moral character. For these reasons, we shall absolutely refuse to receive any but those of good moral character. We respectfully solicit the patronage of those who have moral and orderly sons or wards ; we promise them the usual literary advantages, proper facilities for moral and religious improvement, and intercourse with such society as will be agreeable and profitable.

PREPARATORY STUDIES.

Applicants for admission into the Freshman Class, must stand an approved examination upon *Spelling* ; Oral and Written Arithmetic ; the Grammars of the English, Latin, and Greek Languages ; Latin Reader ; Cæsar ; two Books of Ovid ; Virgil's *Bucolics* ; Greek Reader ; Algebra, to Equations of the Second Degree ; and Modern Geography.

COURSE OF INSTRUCTION.

Freshman Class.

FIRST TERM.

1. LATIN—Virgil, with special attention to Latin Construction and Prosody.
2. GREEK—Anabasis; Construction, and a careful review of the whole Grammar.
3. MATHEMATICS—Algebra and Geometry.
4. ENGLISH LITERATURE—Embracing English Grammar, Prosody, Metres, Penmanship, and Composition.

SECOND TERM.

1. LATIN—Virgil, with Latin Construction, Mythology, and Ancient Geography.
2. GREEK—Anabasis.
3. MATHEMATICS—Algebra and Geometry.
4. NATURAL SCIENCE—Natural Philosophy, with Lectures.
5. ENGLISH LITERATURE—Book-keeping and Composition.

THIRD TERM.

1. LATIN—Cicero's Orations, with Arnold's Exercises in Latin Composition.
2. GREEK—Herodotus, with special exercises in Idioms and Greek Antiquities.
3. MATHEMATICS—Algebra and Geometry.
4. ENGLISH LITERATURE—History of the United States and Composition.

Sophomore Class.

FIRST TERM.

1. LATIN—Sallust, with exercises in Latin Composition.
2. GREEK—Homer, with close study of Particles and Idioms.
3. MATHEMATICS—Trigonometry, Mensuration, Surveying, and Navigation, with practical exercises.
4. NATURAL HISTORY—Gould's Principles of Zoology, with Lectures.

CATALOGUE OF NORMAL COLLEGE.

SECOND TERM.

1. LATIN—Cicero de Officiis, and Terence.
2. GREEK—Homer, with exercises in writing Greek.
3. MATHEMATICS—Spherical Trigonometry and Conic Sections.
4. ENGLISH LITERATURE—Comstock's Elocution, Astronomy, and Composition.

THIRD TERM.

1. LATIN—Livy, Lectures on Latin Literature.
2. GREEK—Demosthenes on the Crown.
3. MATHEMATICS—Analytical Geometry.
4. ENGLISH LITERATURE—Wilson's Outlines of Universal History, with Lectures.

Junior Class.

FIRST TERM.

1. LATIN—Horace's Odes, and Juvenal.
2. GREEK—Thucydides, exercises in writing Greek.
3. MATHEMATICS—Differential Calculus.
4. RHETORIC—Blair, Whateley, and Campbell, with regular exercises in English Composition.

SECOND TERM.

1. LATIN—Cicero de Oratore, translations into English.
2. GREEK—Reviews.
3. MATHEMATICS—Integral Calculus, and the formation of Tables.
4. LOGIC—Whately and Mill.
5. URANOGRAPHY—Burrit, exercises with Globes.
6. FRENCH—Grammar and Fables.

THIRD TERM.

1. LATIN—The Satires of Horace.
2. GREEK—The Ajax of Sophocles, Kuhner's Greek Grammar.
3. MATHEMATICS—Olmstead's, Lardner's, and Renwick's Mechanics, with Lectures.
4. NATURAL SCIENCE—Chemistry and Botany.
5. ENGLISH LITERATURE—History of the Middle Ages, and Composition.
6. FRENCH—Charles XII. and Telemaque.

Senior Class.

FIRST TERM.

1. LATIN—The Germania and Agricola of Tacitus.
2. GREEK—Reviews, and exercise in Writing.
3. MATHEMATICS—Mathematical Astronomy, and the History of Science, with Lectures.
4. PHILOSOPHY—Upham and Reid on Mental Science, with Lectures.
5. FRENCH—Moliere.
6. GEOLOGY AND MINERALOGY.

SECOND TERM.

1. LATIN—Cicero on the Immortality of the Soul.
2. GREEK—Testament, Homer, and Sophocles.
3. MATHEMATICS—Astronomical Calculations, with Reviews on Algebra, Geometry, and Trigonometry.
4. POLITICAL ECONOMY—With Lectures on the Law of Nations, Constitution of the United States, etc.
5. LECTURES ON MODERN LITERATURE.

THIRD TERM.

1. LATIN AND GREEK—Two Recitations a week on such Books as the Professor may select.
2. MORAL SCIENCE—With Lectures.
3. MATHEMATICS—Civil Engineering and Reviews.
4. EVIDENCES OF CHRISTIANITY—Alexander, Paley, and Butler.
5. LECTURES ON NATURAL SCIENCE AND HISTORY.

Lectures.

Several extensive and important series of Lectures are delivered to the different classes; some are in connection with text books, apparatus, minerals, charts, and other means of illustration; others give more ample information, and extend the range of thought far beyond such books as are usually placed in the hands of Students. These Lectures have been procured with much labor and expense, and are designed, with the study required, to effect as complete mental discipline and development, as the age at which young men generally graduate, will possibly permit.

Apparatus, Museum, &c.

We have a very excellent Apparatus, made by Chamberlain & Ritchie, of Boston; we are well prepared to give as ample instruction and illustration in the Natural Sciences and their applications, as Colleges are generally, or as any person could reasonably desire.

A very considerable Museum and Cabinet of Minerals have been collected, embracing many rare and valuable specimens; but we regard our acquisitions thus far, as a mere beginning. All this country is immensely rich in such materials, and by proper exertions, a Cabinet could speedily be collected, that would equal the very best in the world. It is hoped that the friends of the College, both Ministers and Laymen, will collect a quantity in every community. Gather a sample of every kind; do not suppose that any thing is *too common*. We will pay all expense of transportation. Many foreign minerals will be necessary to complete our collection, and these can readily be obtained so soon as we can offer good specimens in exchange. We specially want a large collection of fossils from the eastern counties; these would be of great value to the Institution.

English Course.

This embraces all the studies of the Regular Course except Latin and Greek, and those who complete it will receive an English

Diploma, with the Degree specified. Students in this course enjoy the same College privileges as others, and recite with the regular classes. For such as desire a complete English education without the classics, we have every reasonable facility; we think it very desirable to take the full course, but when this cannot be done, or is not preferred, we give such instruction and honors as other Institutions, that have adopted the English course of study.

Partial Course.

As very many young men wish to spend one or more sessions at some institution of high grade, they are invited to examine our accommodations and advantages. Such will be cordially received, and [all reasonable efforts will be made to render their stay here both pleasant and profitable.

Examinations for Admission.

The regular times for examining applicants are Monday and Tuesday preceding Commencement day, and Monday and Tuesday preceding the commencement of the Fall Term. Candidates will be received into any Class up to the Third Term of the Senior, by standing an approved examination upon the previous studies of the Class; and students will be received at any time during the year, but the times above specified, or the commencement of a Term, are preferable.

Degrees.

Before any Student can Graduate, he must complete the whole course of study, and must, during the last Term of his Senior year, stand approved examinations upon every study in the Collegiate course; none will receive Diplomas but those who are really good scholars, and possess a good moral character. The Degree of A. M. may be conferred upon all regular graduates of three years' standing, but will not follow as a matter of course; this Degree will be

conferred upon none but such as sustain a fair literary character, and exhibit moral and useful lives. The usual Honorary Degrees are conferred upon such persons as the Trustees may deem worthy.

Reports, Merits, Demerits, &c.

Full reports are sent to Parents and Guardians six times during the year; a strict account of Merits and Demerits is kept with each Student, for all his Recitations and College duties of every kind; and the result is faithfully marked on his Report. To understand the Reports, it must be observed that 100 is the highest number that can be obtained on any one study; first distinction requires an average of 95, second distinction 85, etc. Every Student must recite three times daily, and if his average grade does not exceed 50, he is removed to another class or dismissed. Our patrons may be assured that the reports they receive are the *truth*,--that they neither disguise nor palliate.

Discipline.

We have laws and regulations to which all are required to yield obedience, but we do not think that Students should be left to themselves and the *letter of the law*. We endeavor, by all proper means, personal, public, religious and social, to make every one a useful man. No parent need suppose that his son is deprived of those warnings, admonitions, and affectionate advice, which parental love so carefully administers; we continually use the whole power of kindness and sympathy, and by this means win many youths to excellence. But so soon as we are convinced that a Student *will not* do respectable service, or *will be deteriorated* by remaining, we cause him to be taken home.

Special Remarks for Patrons.

In our reports, we endeavor to give a true account of each Student; we wish to portray the character and ability of each, as

we find them exemplified in College life. The result is sometimes so far from the desires and expectations of parents, that they hastily conclude we do not decide fairly, that the advantages and associations here must be inferior, or that the surroundings are very pernicious in some way. We think parents ought to know the truth and the whole truth, and that our reports are entitled to be considered honest and fair; for certainly we can have no interest in representing a youth worse than he is. All ought to remember that many young men are much worse than their parents suppose; they are frequently addicted to habits that have been carefully concealed; sometimes the real dispositions, repressed by parental authority, never show themselves till the restraints of home are removed; most commonly College discipline and duty call out tendencies and character in their true colors, such perhaps as the parent had never discerned; and in many cases, youths have far less ability and acquirement than parental love has fondly imagined. We take it for granted, that every parent wishes his son to be a man in the true sense; and to foster such a development correctly we must observe both mind and heart, in all their capacities, tendencies, and acquirements. To the best of our ability, we note and describe these, and then seek parental co-operation in obtaining the best results. A young man may be very orderly and discreet in social life, and at the same time possess certain characteristics that will prevent scholarship; one may be a "gentleman" according to society's requisition, and yet be incapable of literary culture, without reversing or repressing many distinguishing traits. In all cases, we seek to accomplish the most good. We should be greatly aided by knowing as accurately as possible the real character at first; and we hope parents and guardians will write freely and unreservedly on this point. If there are any bad habits or wrong dispositions, state them frankly; it will be better for all parties. All disguise between parent and teacher, in reference to the pupil, is unwise and productive of evil.

Expenses.

The term "Board" includes furnished rooms, fuel, washing, and every other necessary in this department, except lights. The variation in price depends mainly upon the amount of attention required. The average price during the past year has been about \$8 50 per month. We find it impossible to establish a uniform price, as things now are; so soon as we can furnish rooms on the College grounds, we can establish regularity, and we shall then be able to reduce the cost of board very considerably.

Tuition, per annum, ...	\$42 00
" in regular Preparatory, ...	36 00
" in irregular and Primary, ...	\$30 to 42 00
Board, per month, ...	\$7 50 to 10 00

Board alone can be obtained at from \$6 to \$7 00 per month; washing, 50 to 75 cents per month; wood, \$1 50 per cord.

To defray the expenses of sweeping, fire-making, bell-ringing, and servants' expenses generally, each Student pays \$3 00 per annum. At the time of first entering, each Student pays \$5 00 for Society and Commencement expenses, and \$2 50 each year thereafter. All damages to buildings, furniture or other property, will be repaired at the expense of the damager.

All moneys, drafts, etc., must be deposited with the President of the College; and all payments, of every description, should be made through him: this will be decidedly for the patron's advantage, and should not be neglected.

Collegiate Year, Vacation.

The collegiate year is embraced in one session, commencing on the first Wednesday of September and ending on the last Thursday of June (Commencement day). There is a holyday of about two weeks at Christmas. Students can enter at any time, and pay from the time of entering to Christmas or Commencement; at which times all bills not paid in advance must be settled: if any remain unpaid, interest is charged. If during the year parents or guardians wish their sons or wards to visit their homes,

or any other place away from the vicinity of the College, a note should be sent to the President to that effect. When money is deposited, it will not be applied to anything but the ordinary College expenses, without special instructions from the parent or guardian.

Students from the low country, or from a great distance, can remain cheaply and pleasantly during vacation. This hill-country is unsurpassed as a summer retreat.

Literary Societies.

There are two Societies, Columbian and Hesperian, with well furnished halls, valuable libraries, and all the usual facilities for improvement of this kind. These Societies have been distinguished from their origin, for their strict adherence to parliamentary rule, their support of College law, their high tone of character, and their eminent literary merit. They are zealously collecting chronicles, traditions, and relics both of Revolutionary and Indian character; and deserve the co-operation of all who desire to see such mementoes of the past preserved and transmitted.

Means of Access.

By the North Carolina Central Railroad, and various lines of stages, the College is easily approached from all points. From the South and West there are two routes, about equal in time and expense,—by Columbia, S. C., and Charlotte, N. C.; or by Kingsville, S. C., Wilmington and Goldsboro, N. C. The College is located five miles from the N. C. Central Railroad, eighty-five miles west of Raleigh. Passengers should stop at Thomasville, at which place they will find the College hack every day except Sunday.

Boarding.

If patrons do not accompany their sons or wards, the President must be consulted before any arrangements are made for boarding, as all such arrangements must be confirmed by the President before any student will be allowed to enter College.

Annual Commencement,

JUNE 24, 1858.

Sunday, June 20.

At 11 o'clock, the Anniversary Sermon before the Fletcherian Society, by REV. J. W. TUCKER.

Monday, June 21.

At night, Declamations by the Freshman Class, and an Address by REV. J. W. TUCKER.

Tuesday, June 22.

At night, Declamation by the Sophomore Class, and an Address by REV. W. E. PELL.

Wednesday, June 23.

At 10 o'clock, the Annual Sermon before the Alumni, by REV. J. E. EVANS, of Georgia.

At 3 o'clock, the Literary Address before the Societies.

At night, Orations by the Junior Class, and Address by REV. W. BARRINGER.

Thursday, June 24.

Commencement Exercises will begin at 10 o'clock.

Thorough Scholarship.

We have established such departments of instruction, and such requisitions in each department, as are thought to be best adapted in this age and in this country to the production of profound scholars. The course of study is as extensive as can possibly be accomplished in four years; the variety amply sufficient to develop all the mental powers and insure an acquaintance with all the great fields of thought, and the teaching will be done by the best instructors the country affords, aided by all necessary apparatus and arrangements. We have no secondary motive or purpose to serve—the noblest form of literary culture is and must be our object. If students are badly prepared we cannot promise to make them scholars; if they must necessarily be urged through in four years, we can do it as well perhaps as others, but we will not endorse the result. We are aware that profound scholarship is not acquired by assumption or “Act of Parliament,” but by accurate study, wholesome discipline and time sufficient for mental growth. That part of the public that supports Trinity asked for a first class College; they shall have it. But in order that the end desired may be reached, we must have boys well prepared, orderly, studious, and a sufficiency of time.

Admission.

We have a well organized Preparatory School directly under the supervision of the College Faculty, hence we receive students of any age or advancement, and place them in the College or Preparatory in such classes as their acquirements may justify.

Applicants for admission into the Freshman Class must stand an approved examination upon *Spelling*, Oral and Written Arithmetic, the Grammars of the English, Latin and Greek Languages, Latin Reader, Cæsar, two Books of Ovid, Virgil's *Bucolics*, Greek Reader, Algebra to Equations of the Second Degree, and Modern Geography. If, in preparing for Trinity, boys are pressed for time to accomplish what is demanded, we earnestly advise them to *learn well* what they do go over, rather than imperfectly to accomplish the whole requisition. There is tenfold greater deficiency generally in the Grammars, Arithmetic and Geography, than in Cæsar, Virgil, the Readers or Algebra.

Course of Instruction.

FRESHMAN CLASS.

FIRST TERM.*

1. LATIN—Virgil, with Mythology and Ancient Geography.
2. GREEK—Anabasis; Construction and a careful Review of the whole Grammar.
3. MATHEMATICS—Algebra and Geometry.
4. ENGLISH LITERATURE—Embracing English Grammar, Prosody, Metres, Penmanship, and Composition.

SECOND TERM.

1. LATIN—Virgil, with Exercises in Latin Composition.
2. GREEK—Anabasis.
3. MATHEMATICS—Algebra and Geometry.
4. NATURAL SCIENCE—Natural Philosophy, with Lectures.
5. ENGLISH LITERATURE—Book-Keeping and Composition.

* The year is divided into three Terms for convenience in classification. Each Term contains fourteen weeks.

THIRD TERM.

1. LATIN—Cicero's Orations, with Exercises in Latin Composition.
2. GREEK—Herodotus, with special Exercises in Idioms and Greek Antiquities.
3. MATHEMATICS—Algebra and Geometry.
4. ENGLISH LITERATURE—History of the United States and Composition.

SOPHOMORE CLASS.

FIRST TERM.

1. LATIN—Sallust, with Exercises in Latin Composition.
2. GREEK—Homer, with Greek Prose Composition.
3. MATHEMATICS—Trigonometry, Mensuration, Surveying and Navigation, with practical exercises.
4. NATURAL HISTORY—Gould's Principles of Zoology, with Lectures.

SECOND TERM.

1. LATIN—Cicero de Officiis and Terence.
2. GREEK—Hamer, with Exercises in writing Greek.
3. MATHEMATICS—Spherical Trigonometry and Conic Sections.
4. ENGLISH LITERATURE—Comstock's Elocution, Astronomy and Composition.

THIRD TERM.

1. LATIN—Livy, Lectures on Latin Literature.
2. GREEK—Demosthenes on the Crown and Exercises in Writing.
3. MATHEMATICS—Analytical Geometry.
4. ENGLISH LITERATURE—Wilson's Outlines of Universal History, with Lectures.

JUNIOR CLASS.

FIRST TERM.

1. LATIN—Horace's Odes and Juvenal.
2. GREEK—Thucydides, exercises in writing Greek.
3. MATHEMATICS—Differential Calculus.
4. RHETORIC—Blair, Whateley and Campbell, with regular exercises in English Composition.

SECOND TERM.

1. LATIN—Cicero de Oratore, translations into English.
2. GREEK—Reviews.
3. MATHEMATICS—Integral Calculus and the formation of Tables.
4. LOGIC—Whately and Mill.
5. URANOGRAPHY—Burrit, exercises with Globes.
6. FRENCH—Grammar and Fables.

THIRD TERM.

1. LATIN—The Satires of Horace.
2. GREEK—The Ajax of Sophocles, Kuhner's Greek Grammar.
3. MATHEMATICS—Olmstead's, Lardner's, and Renwick's Mechanics, with Lectures.
4. NATURAL SCIENCE—Chemistry and Botany.
5. ENGLISH LITERATURE—History of the Middle Ages, and Composition.
6. FRENCH—Charles XII. and Telemaque.

SENIOR CLASS.

FIRST TERM.

1. LATIN—The Germania and Agricola of Tacitus.
2. GREEK—Reviews and exercises in Writing.
3. MATHEMATICS—Mathematical Astronomy, and the History of Science, with Lectures.
4. PHILOSOPHY—Upham and Reid on Mental Science, with Lectures.

5. FRENCH—Moliere.
6. GEOLOGY AND MINERALOGY.

SECOND TERM.

1. LATIN—Cicero on the Immortality of the Soul.
2. GREEK—Testament, Homer and Sophocles.
3. MATHEMATICS—Astronomical Calculations, with Reviews on Algebra, Geometry and Trigonometry.
4. POLITICAL ECONOMY—With Lectures on the Law of Nations, Constitution of the United States, etc.
5. LECTURES ON MODERN LITERATURE.

THIRD TERM.

1. LATIN AND GREEK—Two Recitations a week on such Books as the Professor may select.
2. MORAL SCIENCE—With Lectures.
3. MATHEMATICS—Civil Engineering and Reviews.
4. EVIDENCES OF CHRISTIANITY—Alexander, Paley and Butler.
5. LECTURES ON NATURAL SCIENCE AND HISTORY.

Lectures.

Several extensive and important series of Lectures are delivered to the different classes ; some are in connection with text books, apparatus, minerals, charts, and other means of illustration ; others give more ample information, and extend the range of thought far beyond such books as are usually placed in the hands of Students.—These Lectures have been procured with much labor and expense, and are designed, with the study required, to effect as complete mental discipline and development as the age at which young men usually graduate will possibly permit.

Apparatus, Museum, &c.

We have a very considerable Apparatus, made by Chamberlain & Ritchie, of Boston, but this is to be largely increased by the commencement of the next term. We shall then be as well prepared to give ample instruction and illustration in the Natural Sciences and their applications, as Colleges are generally, or as any person could reasonably desire.

A very considerable Museum and Cabinet of Minerals have been collected, embracing many rare and valuable specimens, but we regard our acquisitions thus far as a mere beginning. All this country is immensely rich in such materials, and by proper exertions, a Cabinet could speedily be collected that would equal the very best in the world. It is hoped that the friends of the College, both Ministers and Laymen, will collect a quantity in every community. Gather a sample of every kind; do not suppose that anything is *too common*. We will pay all expense of transportation. Many foreign minerals will be necessary to complete our collection, and these can readily be obtained so soon as we can offer good specimens in exchange. We specially want a large collection of fossils from the eastern counties; these would be of great value to the Institution.

Partail Course.

As very many young men wish to spend some time at some Institution of high grade, without taking a regular College course, we have so arranged our departments as to afford them every reasonable accommodation. Young gentlemen can enter the Institution, prosecute such studies as they or their friends may determine, and enjoy all the advantages of Libraries, Societies, Laboratory, Lectures, &c. The expense of such a course will not be greater than at other schools where such things are taught.

Special Course.

It is sometimes desirable to prosecute minutely and extensively a few particular studies, in order to prepare for some particular profession or pursuit. For acquiring a thorough practical knowledge of Agricultural Chemistry, Engineering, Geology, Book Keeping, &c., we can offer as many advantages as any other College in the country.

Departments of Instruction.

Those who complete the studies in any department, viz: Mathematics, Latin, Greek, English Literature, and Experimental Science, will receive a testimonial to that effect, signed by the Faculty.

Degrees.

By a late resolution of the Board of Trustees, A. B. will not in any case be conferred as an honorary degree, and before any one can obtain it he must stand an approved examination upon our Course of Instruction. A. M. will not be conferred, as a matter of course, upon graduates of three years standing. It will be bestowed as a literary degree upon such as make application, and after full investigation are deemed worthy to receive it, and as an honorary degree upon those whose superior acquirements and ability merit such distinction. No degree of any kind will be conferred upon any but such as sustain a good moral character.

Reports, Merits, Demerits, &c.

Full reports are sent to parents and guardians six times during the year; a strict account of Merits and Demerits

is kept with each Student, for all his Recitations and College duties of every kind, and the result is faithfully marked on his Report. To understand the Reports, it must be observed that 100 is the highest number that can be obtained on any one study; first distinction requires 95, second distinction 85, etc. Every Student must recite three times daily, and if his average grade does not exceed 50, he is removed to another class or dismissed. Our patrons may be assured that the reports they receive are the *truth*—that they neither disguise nor palliate.

Discipline.

We have laws and regulations [†] which all are required to yield obedience, but we do not think that Students should be left to themselves and the *letter of the law*. We endeavor by all proper means, personal, public, religious and social, to make every one a useful man. No parent need suppose that his son is deprived of those warnings, admonitions and affectionate advice, which parental love so carefully administers; we continually use the whole power of kindness and sympathy, and by this means win many youths to excellence. But so soon as we are convinced that a Student *will not* do respectable service, or *will be deteriorated* by remaining, we cause him to be taken home.

College Vices.

The most prevalent vices in Colleges are drinking spirituous liquors and gambling, whilst the very general habit of carrying "arms" of some kind furnishes the means of creating difficulties and inflicting injuries. Our laws forbid any Student to drink any spirituous liquors of any kind. They also forbid any Student having or using any "weapon," or any cards, or other means whereby

games of chance are played. The chief difficulty in executing these laws arises from the fact that the means and instruments of transgression are generally brought from home. If parents will see that none of these forbidden things are brought or furnished from home we will undertake to insure that they are not procured from other sources.

College Character.

We all recognize the existence of "public opinion," and those acquainted with Colleges have learned that there is a "College opinion," and that said "College opinion" is a very mischievous thing. It has long been the custom in Southern Colleges for Students to have a code of regulations and morals peculiar to themselves. According to this code, they may practice all dissipation, damage property, create disturbances, commit depredations, play tricks, and then club together for concealment, and if one should divulge anything, he is insulted and scoffed. To this "College opinion," we pay no respect, but hold all subject to the morals of a Christian people, and visit with swift punishment every dastardly spirit that attempts to conceal or palliate crime. What young man at his own home would dare buy "night suppers" from negroes, steal chickens from neighbors, and do numerous similar things. Yet such things have been done at Colleges, both patrons and the public laughing at them and letting them pass without censure. Students or patrons who expect such toleration at Trinity will be disappointed; we will not even retain any one as a student who advocates such principles. We ask patrons to consider the subject closely before *they* excuse their sons for such things, or advise them to yield obedience to such a ruinous code of morals. This "College opinion" has never obtained position here and never shall; but we have had some trouble in repell-

ing it, and it has been the cause of nearly every dismission that has ever occurred in this Institution.

Letters of Introduction.

These are common, and generally worthless. Every Student, not accompanied by parent or guardian, should bring a letter, but that letter should state minutely the character of the youth. As to his attainments we can soon ascertain them, and if we knew his disposition, habits and tendencies, we should be able to begin our discipline with much better effect.

Collegiate Year, Vacation.

The collegiate year is embraced in one session, commencing on the first Wednesday of September and ending on the last Thursday of June (Commencement day.) There is a holyday of about two weeks at Christmas.—Students can enter at any time, and pay from the time of entering to Christmas or Commencement; at which times all bills not paid in advance must be settled: if any remain unpaid, interest is charged. If during the year parents or guardians wish their sons or wards to visit their homes, or any other place away from the vicinity of the College, a note should be sent to the President to that effect. When money is deposited, it will not be applied to anything but the ordinary College expenses, without special instructions from the parent or guardian.

Students from the low country, or from a great distance, can remain cheaply and pleasantly during vacation. This hill-country is unsurpassed as a summer retreat.

Literary Societies.

There are two Societies, Columbian and Hesperian, with well furnished halls, valuable libraries, and all the usual facilities for improvement of this kind. These Societies have been distinguished from their origin, for their strict adherence to parliamentary rule, their support of College

law, their high tone of character, and their eminent literary merit. They are zealously collecting chronicles, traditions, and relics both of Revolutionary and Indian character, and deserve the co-operation of all who desire to see such mementoes of the past preserved and transmitted.

Means of Access.

By the North Carolina Central Railroad, and various lines of stages, the College is easily approached from all points. From the South and West there are two routes, about equal in time and expense,—by Columbia, S. C., and Charlotte, N. C.; or by Kingsville, S. C., Wilmington and Goldsboro, N. C. The College is located five miles from the N. C. Central Railroad, eighty-five miles west of Raleigh. Passengers should stop at High Point, at which place they will find the College hack every day except Sunday.

Boarding.

If patrons do not accompany their sons or wards, the President must be consulted before any arrangements are made for boarding, as all such arrangements must be confirmed by the President before any student will be allowed to enter College.

Expenses.

Tuition,	\$42 per annum:
Tuition in Preparatory and Irregular,	\$20 to 42 “
Board,	7 per month.
Board, including rooms, washing, fuel, servants, &c.,	\$8 to 10 “

To defray the expenses of sweeping, fire-making, bell-ringing, &c., each student pays \$3 per annum. At the time of first entering, each student pays \$5 as Matriculation fee, and \$2.50 each year thereafter. All damages to buildings, furniture, or other property, will be repaired at the expense of the damager. These are positively all the

expenses pertaining to the College in any way. All bills are due at Christmas and Commencement, but patrons will save something by paying in advance. \$50 September 1st, and \$75 January 1st, will be about the sums required. All moneys should invariably be deposited with the President. Checks upon any solvent bank will be taken at par, and are preferred when funds are to be sent by mail.

If parents will not give their sons pocket money, and will observe our directions, there will be no disappointment about the expense of an education at Trinity, and we think that more substantial advantages cannot be obtained at less expense.

ANNUAL COMMENCEMENT.

JUNE 30th, 1859.

SUNDAY, JUNE 26.

At 11 o'clock, the ANNIVERSARY SERMON before the Fletcheronian Society.

MONDAY, 27.

Declamations at night by members of the Freshman Class.

TUESDAY, 28.

At 11 o'clock, A. M., the ANNUAL SERMON before the Graduating Class, by Rev. N. F. REID, of North Carolina.

At 2 o'clock, P. M., the ADDRESS to the ALUMNI, by Prof. Johnson, of Trinity College.

At night, Declamations by members of the Sophomore Class.

WEDNESDAY, 29.

At 10 o'clock, the LITERARY ADDRESS before the Societies, by Rev. J. H. Cross, of S. C.

At 2 o'clock, the CHINA MISSIONARY MEETING, to be conducted by Dr. Schon, assisted by Rev. M. L. Wood, Dr. Deems, Rev. R. T. Hefin, and others.

At night, Orations by the JUNIOR CLASS.

THURSDAY, 30.

Commencement Exercises to begin at 10 o'clock.

Tutor of Latin and Greek.

R. H. SKEEN, A. B.,
Tutor of Mathematics.

Graduates.

The College was chartered in 1851, and graduated the first class in 1853. The following exhibits the names and pursuits of those who have received Diplomas.

1853.

- | | |
|----------------------|--|
| D. C. JOHNSON, . . . | Member of the North Carolina Conference. |
| L. JOHNSON, . . . | Professor in Trinity College. |

1854.

- | | |
|--------------------------|--|
| L. H. CARTER, . . . | Tutor in Emory and Henry College, Va. |
| C. C. COLE, . . . | Editor of Times, Greensboro', N. C. |
| J. A. EDWARDS, . . . | Farmer, Hookerton, N. C. |
| J. W. PEARSON, . . . | Member of the St. Louis Conference. |
| J. W. PAYNE, . . . | Lawyer, Greensboro', N. C. |
| S. D. PEELER, . . . | Member of the North Carolina Conference. |
| T. S. WHITTINGTON, . . . | Principal of Kernersville Institute, N. C. |
| I. L. WRIGHT, . . . | Professor in Trinity College. |

1855.

- | | |
|-----------------------|---|
| J. W. ALSPAUGH, . . . | Lawyer, and Editor of the Western Sentinel. |
| D. R. BRUTON, . . . | Member of the North Carolina Conference. |
| ALSON FULLER, . . . | Physician, Science Hill, N. C. |
| J. S. LEACH, . . . | Physician, Leachburg, N. C. |
| H. T. ROPER, . . . | Principal of Gainesville Seminary, Fla. |
| M. L. WOOD, . . . | Missionary, China. |

1856.

- | | |
|------------------------|--|
| R. F. ANDREWS, . . . | Physician, Eden, N. C. |
| L. BRANSON, . . . | Principal Lenoir Collegiate Institute, N. C. |
| E. FAW, . . . | Lawyer, Marietta, Ga. |
| W. C. GANNON, . . . | Member of the North Carolina Conference. |
| G. W. HEGE, . . . | Principal of Yadkin Institute, N. C. |
| J. E. SHORT, . . . | Lawyer, Plymouth, N. C. |
| J. F. SMOOT, . . . | Member of the North Carolina Conference. |
| W. H. WEATHERLY, . . . | Principal of Hertford Academy, N. C. |

1857.

- | | |
|----------------------|---------------------------------------|
| W. W. FLOOD, . . . | Lawyer, Henry Co., Va. |
| F. C. FRAIZER, . . . | Principal of Grove Hill Academy, Ala. |
| G. L. HEARN, . . . | Physician, Holly Springs, Miss. |
| J. S. MIDYETT, . . . | Teacher, Everettsville, N. C. |
| L. R. WRIGHT, . . . | Lawyer, Darlington, S. C. |

J. H. ROBBINS, . . .	Member of the North Carolina Conference.
R. S. SMALL, . . .	Teacher in Deaf and Dumb Asylum, Raleigh.
W. F. WATSON, . . .	Teacher in Kansas.
J. R. WINSTON, . . .	Principal of Memphis Academy, Tenn.
W. C. WHITE, . . .	Principal of Lebanon High School, Mo.

Degrees.

By a late resolution of the Board of Trustees, A. B. will not in any case be conferred as an honorary degree, and before any one can obtain it he must stand an approved examination upon our Course of Instruction. A. M. will not be conferred as a matter of course, upon graduates of three years standing. It will be bestowed as a literary degree upon such as make application, and after full investigation are deemed worthy to receive it, and as an honorary degree upon those whose superior acquirements and ability merit such distinction. No degree of any kind will be conferred upon any but such as sustain a good moral character.

Course of Instruction.

FRESHMAN CLASS.

First Term.*

Latin—Virgil, with Mythology and Ancient Geography.
Greek—Anabasis; Construction, and a careful Review of the whole Grammar.

Mathematics—Algebra and Geometry.

English Literature—Embracing English Grammar, Prosody, Metres, Penmanship and Composition.

Second Term.

Latin—Virgil, with Exercises in Latin Composition.
Greek—Anabasis.

Mathematics—Algebra and Geometry.

Natural Science—Natural Philosophy, with Lectures.

English Literature—Book-Keeping and Composition.

Third Term.

Latin—Cicero's Orations, with exercises in Latin Composition.

Greek—Herodotus, with special Exercises in Idioms and Greek Antiquities.

Mathematics—Algebra and Geometry.

English Literature—History of the United States and Composition.

SOPHOMORE CLASS.

First Term.

Latin—Sallust, with Exercises in Latin Composition.

Greek—Homer, with Greek Prose Composition.

*The year is divided into three Terms for convenience in classification. Each Term contains fourteen weeks.

CATALOGUE OF TRINITY COLLEGE.

Mathematics—Trigonometry, Mensuration, Surveying and Navigation, with practical exercises.

Natural History—Gould's Principles of Zoölogy, with Lectures.

Second Term.

Latin—Cicero de Officiis, and Terence.

Greek—Homer, with Exercises in Writing Greek.

Mathematics—Spherical Trigonometry and Conic Sections.

English Literature—Comstock's Elocution, Astronomy, and Composition.

Third Term.

Latin—Livy, with Lectures on Latin Literature.

Greek—Demosthenes on the Crown, and Exercises in Writing.

Mathematics—Analytical Geometry.

English Literature—Willson's Outlines of Universal History, with Lectures.

JUNIOR CLASS.

First Term.

Latin—Horace's Odes, and Juvenal.

Greek—Thucydides, with Exercises in Writing Greek.

Mathematics—Differential Calculus.

Rhetoric—Blair, Whately, and Campbell, with Regular Exercises in English Composition.

Second Term.

Latin—Cicero de Oratore, Translations into English.

Greek—Reviews.

Mathematics—Integral Calculus, and the Formation of Tables.

Logic—Whately and Mill.

Uranography—Burritt, Exercises with Globes.

French—Grammar and Fables.

Third Term.

Latin—The Satires of Horace.

Greek—The Ajax of Sophocles, Kuhner's Greek Grammar.

CATALOGUE OF TRINITY COLLEGE.

Mathematics—Olmsted's, Lardner's, and Renwick's Mechanics, with Lectures.
Natural Science---Chemistry and Botany.
English Literature---History of the Middle Ages, and Composition.
French---Charles XII. and Telemaque.

SENIOR CLASS.

First Term.

Latin—The Germania and the Agricola of Tacitus.
Greek---Reviews, and Exercises in Writing.
Mathematics---Mathematical Astronomy, and the History of Science, with Lectures.
Philosophy---Upham and Reid on Mental Science, with Lectures.
French---Moliere.
Geology and Mineralogy.

Second Term.

Latin---Cicero on the Immortality of the Soul.
Greek---Testament, Homer, and Sophocles.
Mathematics---Astronomical Calculations, with Reviews on Algebra, Geometry, and Trigonometry.
Political Economy---With Lectures on the Law of Nations, Constitution of the United States, &c.
Lectures on Modern Literature.

Third Term.

Latin and Greek---Two Recitations a week on such Books as the Professor may select.
Moral Science---With Lectures.
Mathematics---Civil Engineering and Reviews.
Evidences of Christianity---Alexander, Paley, and Butler.
Lectures on Natural Science and History.

Admission.

Applicants for admission into the Freshman Class must stand an approved examination upon Oral and Written Arithmetic, the Grammars of the English, Latin and Greek Languages, Latin Reader, Caesar, two Books of Ovid, Virgil's *Bucolics*, Greek Reader, Algebra to Equations of the Second Degree, and Modern Geography. If, in preparing for Trinity, boys are pressed for time to accomplish what is demanded, we earnestly advise them to *learn well* what they do go over, rather than imperfectly to accomplish the whole requisition. There is tenfold greater deficiency generally in the Grammars, Arithmetic and Geography, than in Caesar, Virgil, the Readers or Algebra.

Preparatory Department.

We have a Preparatory School under the immediate supervision of the Faculty. We receive boys of any age or attainment. Their arrangements for study are pleasant, their instruction thorough, their expenses as moderate as at Preparatory Schools generally, and the careful discipline they receive enables them to succeed better after they enter College. In this department, we use Bullions's Grammars, Emerson's Arithmetic, Mitchell's Geography, and Loomis's Algebra.

Partial Course.

As very many young men wish to spend some time at some Institution of high grade, without taking a regular College course, we have so arranged our departments as to afford them every reasonable accommodation. Young gentlemen can enter the Institution, prosecute such studies as they or their friends may determine, and enjoy all the advantages of Libraries, Societies, Laboratory, Lectures, &c. The expense of such a course will not be greater than at other schools where such things are taught.

Lectures and Practical Exercises.

During the year there are several courses of Lectures and Practical Exercises. Irregular students may attend these by paying the usual fees. The following is the programme for the next Collegiate year:—

Mental Science—From Aug. 20th to Dec. 1st.

Mineralogy and Geology—From Sept. 1st to Dec. 1st. To the theory on these subjects will be added full practical testing, explanations, &c.

Rhetoric—From Aug. 20th to Nov. 20th.

Zoölogy—From Aug. 20th to Nov. 15th. Our Museum is small, but we shall increase it as fast as possible.

Trigonometry and Surveying—From Aug. 16th to Dec. 14th. The field exercises will be extensive, and the instruments of the best quality.

International Law and Political Economy—From Jan. 3rd to April 8th.

Natural Philosophy—From Jan. 3rd to Mar. 10th. Our apparatus on this subject is ample.

Chemistry—From Jan. 3rd to April 8th.

Book-Keeping and Penmanship—From Jan. 10th to April 8th.

Moral Science and Evidences of Christianity—From April 10th to June 1st.

Agricultural Chemistry—From April 10th to June 1st. Complete practical instruction will be given in Tests and Analysis.

Civil Engineering—From April 10th to June 1st. This will embrace road surveys and calculation, Architectural Drawing, Construction, Materials, &c.

We shall spare no effort or expense to make our instruction on the above subjects of the very best character. We invite attention to Natural Science especially. To young gentlemen who wish to take a Scientific Course, we offer as many inducements as any Institution in the country.

CATALOGUE

OF

Trinity College,

NORTH CAROLINA.

1860-'61.

GREENSBOROUGH :

PRINTED AT THE TIMES OFFICE : BY JAMES W. ALBRIGHT.

1861.

Commencement for 1861.

DECLAMATION,

Monday evening, June 17th, by the Freshman Class.

Tuesday evening, by the Sophomore Class.

ORIGINAL SPEECHES

By the Junior Class, on Wednesday evening.

SERMONS.

Tuesday afternoon, Sermon before the Fletcher Society
by Rev. L. S. Burkhead.

Wednesday, 10 o'clock, A.M., Sermon to the Graduating
Class by Rev. A. L. Hamilton, D.D., of Clarksville, Tenn.

ADDRESS.

Wednesday, 2 o'clock, P.M., Address to the Alumni by
Rev. J. W. Tucker.

COMMENCEMENT, Thursday, June 30th.

Calendar for 1861--'62.

Our exercises will regularly continue as follows:

August 14—Term Commences.

December 18—Holyday Commences.

January 6—Exercises Resumed.

June 5—Senior Vacation.

June 19—Commencement.

Board of Trustees.

DEGREES.

By a late resolution of the Board of Trustees, A. B. will not in any case be conferred as an honorary degree, and before any one can obtain it, he must stand an approved examination upon our Course of Instruction. A. M. will not be conferred as a matter of course, upon graduates of three years standing. It will be bestowed as a literary degree upon such as make application, and after full investigation are deemed worthy to receive it, and as an honorary degree upon those whose superior requirements and ability merit such distinction. No degree of any kind will be conferred upon any, but such as sustain a good moral character.

Juniors	24	Virginia	10
Sophomores	31	South Carolina	18
Freshmen	32	Georgia	11
Preparatory and		Mississippi	2
Irregular	109	Texas	1
	—		—
Total	215	Total,	215.

Admission.

Applicants for admission into the Freshman Class, must sustain an approved examination upon Oral and Written Arithmetic; the Grammars of the English, Greek and Latin Languages; Latin Reader, Caesar, Ovid, Virgil's *Bucolics* and Six Books of the *Æneid*; Latin Prosody; Greek Reader or *Græca Minora*; St. John's Gospel in the Greek Testament; Ancient and Modern Geography; Algebra, through equations of the first degree.

Applicants for more advanced standing will be examined on all the studies already accomplished by the class they wish to join.

It is very desirable, that the preparatory schools should bestow more attention upon the Grammars, Prosody, Construction and Geography. The preparatory studies in this country are very limited at best, and every part of the small amount required is absolutely essential in order to obtain the advantages of a Collegiate education.

Course of Instruction.

FRESHMAN CLASS.

First Term.

Latin.—Cicero's Orations, Virgil's Georgics, and Arnold's Prose Composition.

Greek.—Xenophon's Anabasis, and the Greek Testament.

Mathematics.—Algebra, through equations of the second degree; the Science of Form and Six Books of Loomis' Geometry.

English Literature.—English Grammar twice per week, Writing twice, and Composition one time.

Second Term.

Latin.—Sallust and Curtius, or Livy; Arnold's Latin Prose.

Greek.—Herodotus, and Arnold's Greek Prose.

Mathematics.—Algebra and Geometry completed.

Natural Science.—Natural Philosophy, with Lectures.

English Literature.—Book Keeping, Composition.

SOHHOMORE CLASS.

First Term.

Latin.—The Odes and Epodes of Horace, Arnold's Prose Composition.

Greek.—Homer's Iliad, Arnold's Greek Prose.

Mathematics.—Trigonometry, Surveying, Navigation, Spherical Trigonometry &c.

Natural Science.—Zoology and Astronomy.

English Literature.—History, Composition.

Second Term.

Latin.—Satires of Horace, Cicero De Oratore, Written Exercises.

Greek.—Demosthenes, Thucydides, Arnold's Greek Prose.

Mathematics.—Analytical Geometry, Differential Calculus.

English Literature.—Ancient History, Elocution.

French.—Pajol and Van Norman's Class Book, Part First.

JUNIOR CLASS.

First Term.

Latin.—Juvenal and Tacitus.

Greek.—Sophocles, Demosthenes, Exercises in Writing.

Mathematics.—Integral Calculus, Mechanics.

Rhetoric, Logic.—Logie, Rhetoric, through different kinds of Composition, Figurative Language and Style.

French.—Second Part of Pujol and Van Norman's Class-Book, Charles XII.

Second Term.

Latin.—Cicero De Officiis, Ars Poetica of Horace, Latin Composition.

Greek.—Greek Tragedy, selected by the Professor.

Mathematics.—Mathematical Astronomy, Construction of Tables, &c.

Rhetoric.—Rhetoric completed, Lectures on Modern Literature.

Natural Science.—Chemistry, Botany, Uranography.

French.—Télémaque.

SENIOR CLASS.

First Term.

Latin.—Cicero on the Immortality of the Soul, Virgil and Cicero reviewed.

Greek.—Plato's Gorgias, Xenophon reviewed.

Mathematics.—Reviews and Lectures.

Metaphysics.—Mental Philosophy, and International Law.

Natural Science.—Mineralogy and Geology.

Second Term.

Languages.—Reviews in Latin and Greek, Lectures and Readings in Modern Literature.

Mathematics.—Civil Engineering, Drawing and Construction; reviews of Astronomy and Mechanics.

Metaphysics.—Constitutional Law; Political Economy, Moral Science; Evidences of Christianity.

Natural Science.—Analytic and Agricultural Chemistry.

French.—Moliere.

All the Classes have exercises regularly in composition, and such other duties as are considered appropriate for the developement of expression, scholarship and taste.

Every Student is required to attend Divine Service in the College chapel on the Sabbath, also to recite regularly in Sabbath School.

PREPARATORY DEPARTMENT.

We have a Preparatory School under the immediate supervision of the Faculty. We receive boys of any age or attainment. Their arrangements for study are pleasant, their instruction thorough, their expenses as moderate as at Preparatory Schools generally, and the careful discipline they receive enables them to succeed better after they enter College. In this department, we use Bullions' Grammars, Emerson's Arithmetic, Mitchell's Geography and Loomis' Algebra.

PARTIAL COURSE.

As very many young men wish to spend some time at some institution of high grade, without taking a regular college course, we have so arranged our departments as to afford them every reasonable accommodation. Young gentlemen can enter the Institution, prosecute such studies as they or their friends may determine, and enjoy all the advantages of Libraries, Societies, Laboratory, Lectures, &c. The expense of such a course will not be greater than at other schools where such things are taught. To young gentlemen who wish to take a scientific course, we offer as many inducements as any institution in the country.

REPORTS, MERITS, DEMERITS, &c.

Full Reports are sent to parents and guardians six times during the year; a strict account of Merits and Demerits is kept with each student, for all his Recitations and Col-

lege duties of every kind, and the result is faithfully marked on his Report. To understand the Reports, it must be observed that 100 is the highest number that can be obtained on any one study; first distinction requires 95, second distinction 85, &c. Every student must recite three times daily, and if his average grade does not exceed 50, he is removed to another class or dismissed. Our patrons may be assured that the reports they receive are the *truth*—that they neither disguise, nor palliate.

DISCIPLINE.

We have laws and regulations to which all are required to yield obedience, but we do not think that students should be left to themselves and the *letter of the law*. We endeavor by all proper means, personal, public, religious and social, to make every one a useful man. No parent need suppose that his son is deprived of those warnings, admonitions and affectionate advice, which parental love so carefully administers; we continually use the whole power of kindness and sympathy, and by this means win many youths to excellence. But so soon as we are convinced that a student *will not* do respectable service, or *will be deteriorated* by remaining, we cause him to be taken home.

COLLEGIATE YEAR, VACATION.

Commencement day is on the third Thursday of June, the next term begins seven weeks after the following Wednesday. The year is divided into two terms, the first ending about the 15th of December; the second term begins on the first Monday in January, and closes on the third Thursday of June.

COLLEGE LAWS.

Before any student's name is enrolled, he will receive a printed copy of our laws and regulations; if he then enters College, he will be considered as pledging his honor to observe the laws of the Institution to the best of his ability.

ENTERING COLLEGE.

Students may enter at any time, and pay from the time of entering to the end of the term. Students who remain away two or three weeks at the beginning of any term, and then enter the regular classes, will be charged for the whole time. No deduction is at any time made after entering, except in cases of protracted sickness.

LETTERS OF INTRODUCTION.

Students, unattended by guardian or parent, must bring a letter authorizing them to enter College; those who are twenty-one years of age, must bring letters of introduction.

NEW BUILDINGS.

During the last year, we have contracted for the erection of a very large building, when this is completed, we shall be able to accommodate our students in a very superior manner. Our chapel, halls and dormitories will have every arrangement for comfort and elegance.

BOARDING.

If patrons do not accompany their sons or wards, the President must be consulted before any arrangements are made for boarding, as all such must be confirmed before any student will be allowed to enter College.

ABSENCE FROM COLLEGE.

If patrons wish their sons or wards to leave the College during the year, for the purpose of visiting home or any other place at a distance, a note to that effect must be sent to the President.

EXERCISE.

Arrangements will be completed for regular, systematic, physical training, securing health, development and all proper manly accomplishments.

DEPORTMENT.

Every student must observe such propriety of language, form in manners, and gentlemanly deportment, as are proper for cultured, christian people; using intoxicating liquors, profane or indecent language, or any similar impropriety, will be cause for suspension or dismissal.

EXPENSES.

Tuition.....	\$50.00 per annum.
Tuition in Preparatory and Irregular.....	\$36.00 to 50.00 " "
Board including room, furniture & serv'ts	8.00 to 10.00 per month.
Washing.....	50 to 75 " "
Fuel—delivered costs.....	\$1.50 per cord.

The whole expense for board, room, fuel, washing, &c., usually costs \$10 per month. We can furnish board in almost any way desirable, those wishing to live very cheaply, can do so; those desiring more elegance and comfort, can have them.

Each student pays \$5 Matriculation fee at the time of first entering, and \$3 per annum for Janitor fee. Connection, with the Literary Societies, costs about \$5 per annum, and Commencement expenses are usually from \$3 to \$5.

These are all the items of expense that can, in any way, pertain to the College. Exclusive of Matriculation, the expenses may be estimated as follows:

FIRST TERM.

Tuition.....	\$22.00 to \$22.00
Janitor fee.....	1.25 to 1.25
Board, washing, fuel, &c.....	36 00 to 45.00
Society expenses.....	2.00 to 2.00
	\$61.25 \$70.25

SECOND TERM.

Tuition.....	\$28.00 to \$28.00
Janitor fee.....	1.75 to 1.75
Board, washing, fuel, &c.....	48.00 to 60.00
Society expenses.....	3.00 to 3.00
Commencement expenses.....	3.00 to 5.00
	\$83.75 \$97.75

In the Preparatory the expenses will be less. All funds for College expenses of every kind should be deposited with the President, and all payments should be made through him. No student should keep money in his trunk. Checks are in all instances preferable, when funds are to be sent from a distance. Patrons may rely upon these sums as being sufficiently large.

Tuition must be settled in advance for each term, and funds should be deposited to pay at least half the board. Fees, room-rent, books and board unpaid, will be due at

the end of each term, and interest will in all cases be charged when payment is not made.

Young men of good character, who have no means to pay, may be aided; they can correspond with the President.

LITERARY SOCIETIES, LIBRARIES.

There are two Literary Societies having elegant halls, well selected libraries, and affording the usual facilities of such associations.

Columbian Library,	2,200 volumes.
Hesperian “	2,200 “
College “	650 “

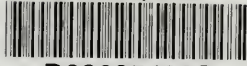

MEANS OF ACCESS.

By the North Carolina Railroad and various lines of stages, the College is easily approached from all points. All passengers by the Railroad should stop at High Point, at which place they will find the College stage every day except Sunday. All bundles and packages for Trinity, should be directed to High Point, care of College stage.

POST OFFICE.

Our post office is at the College, hence direct to “Trinity College, N. C.”
